Plastic Surgery Oral Board Prep: Management Q&A by Devra Becker restructures core plastic surgery knowledge into the conceptual framework needed for mastery of the plastic surgery oral board exam. It fills a gap in the literature, exploring levels of knowledge such as analysis, synthesis, and evaluation, as well as practical applications including fluid management, intraoperative and postoperative challenges, and ethical considerations. Questions and answers on key reconstructive, aesthetic, and elective procedures are encompassed throughout 22 chapters, enabling readers to synthesize knowledge and articulate it efficiently and effectively.

#### Key Highlights

1. Nearly 400 Q&A mirror the type and sequencing of questions on the oral board exam
2. Reconstruction topics include skin cancer, facial defects and trauma, back and trunk, traumatic hand injuries, lower extremity wounds, cleft lip and palate, and craniosynostosis syndromes
3. Aesthetic and elective surgery chapters cover the aging face, breast, body and trunk, and hand
4. Current recommendations for management of coexisting medical conditions such as thromboembolism prophylaxis and perioperative management of cardiac disease
