Mineral resource management in Croatia

Slobodan, Miko*; Dragan Vidić**, Boris Kruk*;
Dragan Krasić**

* Croatian Geological Survey, Department for mineral resources
Sachsova 2, Zagreb, 10000, Croatia

**Ministry of Economy, Labour and Entrepreneurship, Mining
Department, Zagreb, Ulica grada Vukovara 78, Croatia

TAIEX event: INFRA 25708 :

Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.

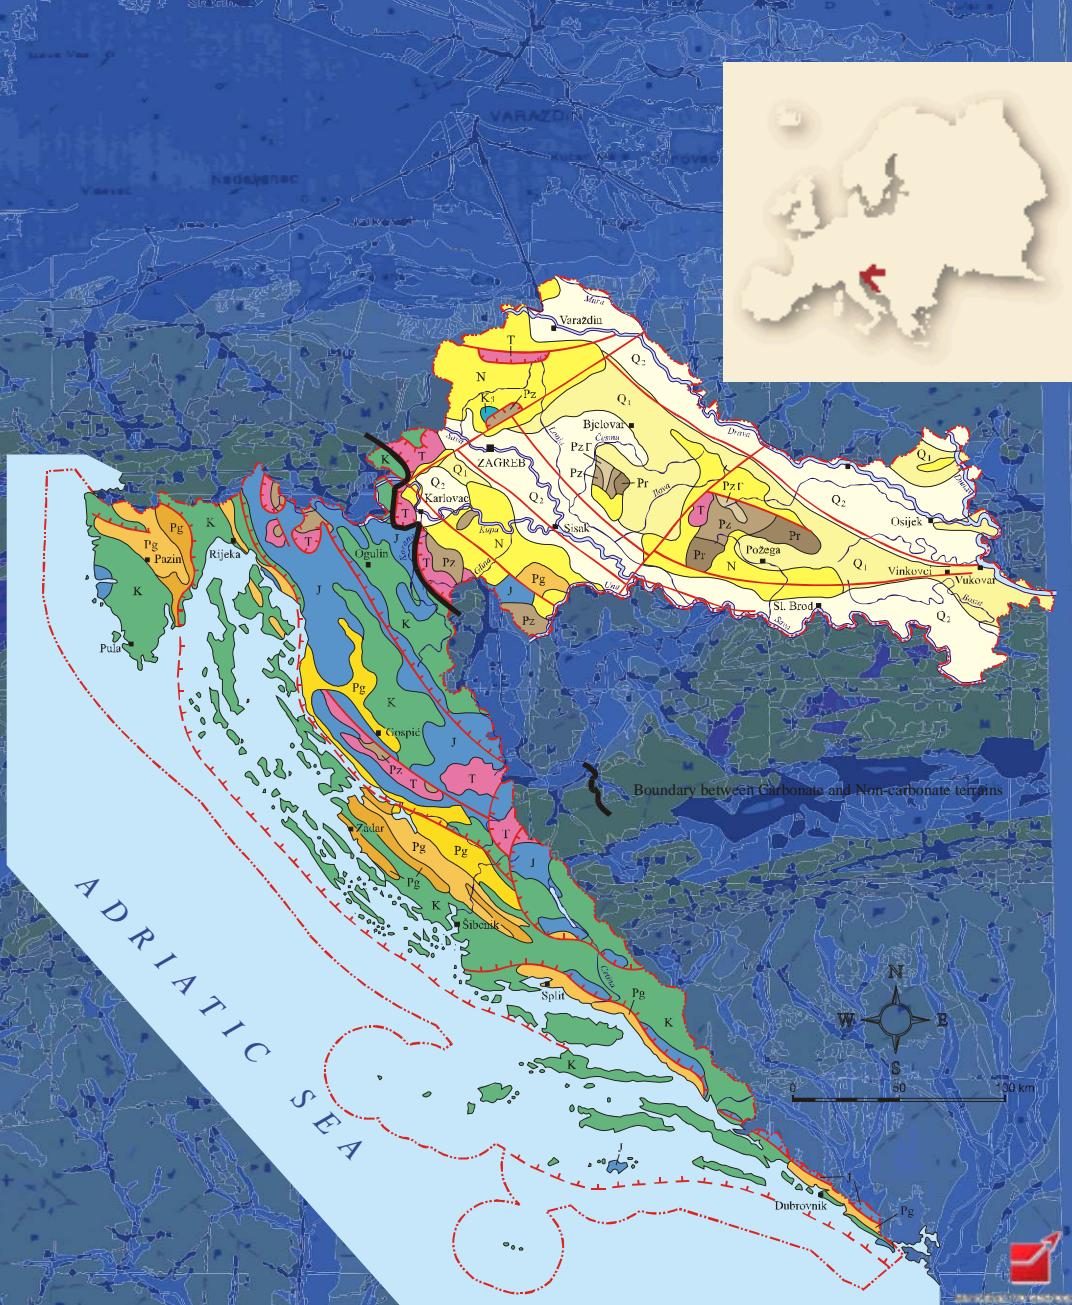

Ljubljana 10/12/2007 - 11/12/2007

HGI-CGS

HRVATSKI GEOLÓŠKI INSTITUT

Geology of Croatia

- >50% carbonate rock
(limestone and dolomite mainly Mesozoic Adriatic Carbonate Platform)
- 40 % thick unconsolidated Quaternary sedimentary deposits (Pannonian basin)
- <5% eruptive and metamorphic rocks

TAIEX event: INFRA 25708 :
Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.
Ljubljana 10/12/2007 - 11/12/2007

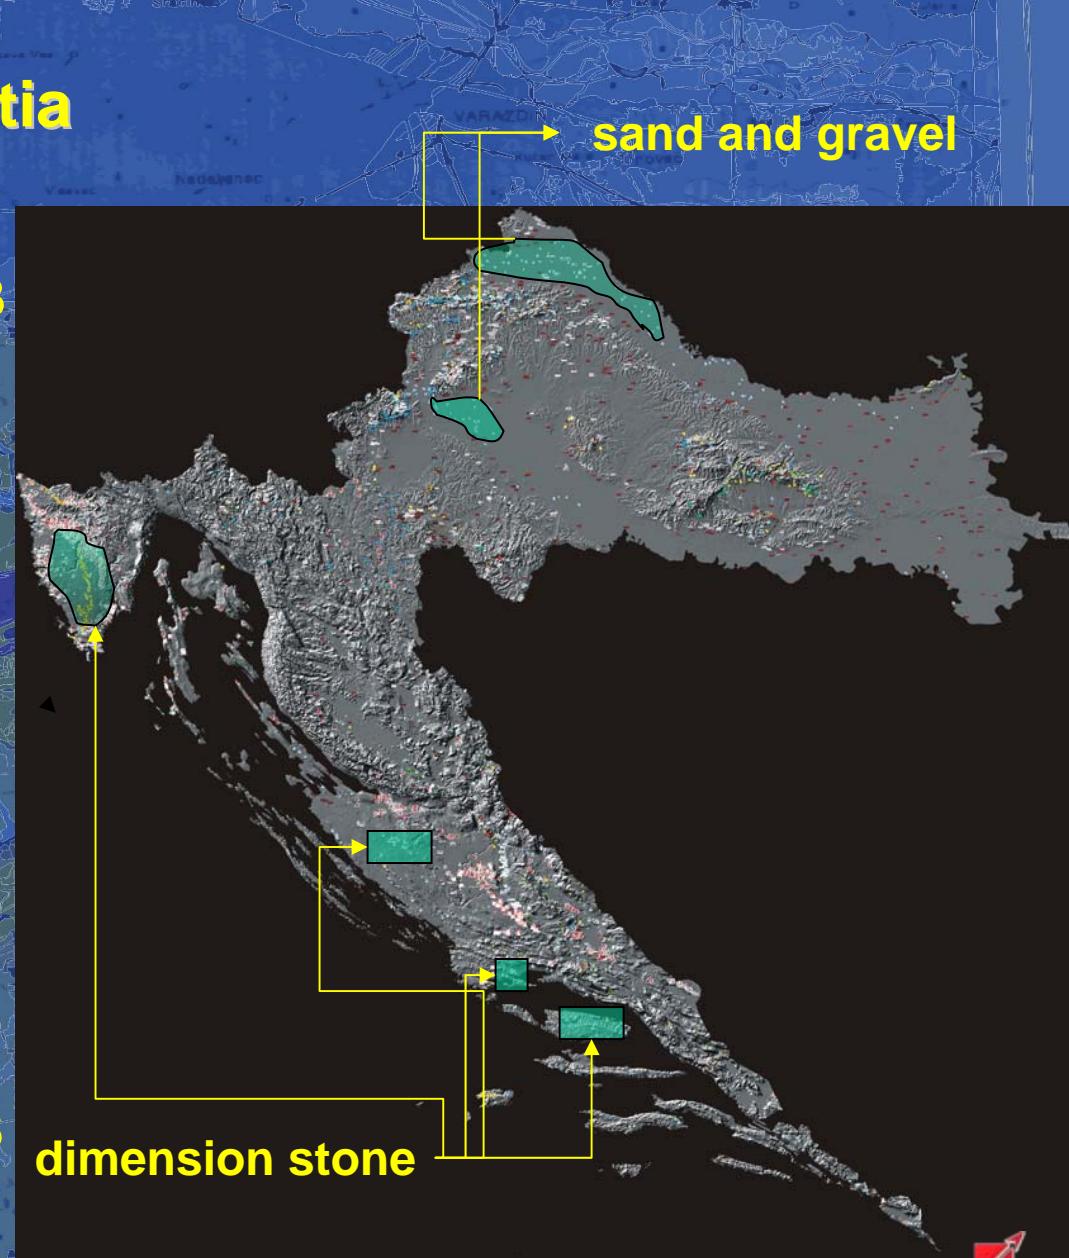

Mineral resources of Croatia

Mineral commodity:

- crushed stone aggregate; 253 sites
- dimension stone; 103 sites
- sand and gravel; 82 sites
- clay; 49 sites
- bauxite ; 15 sites
- gypsum; 9 sites
- other non metal deposits
- coal in the past

**• 626 EXPLOATION SITES
(378 km²)**

**. 4000 SITES WITH DEPOSITS
OR MINERAL OCCURANCES**

TAIEX event: INFRA 25708 :

Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.

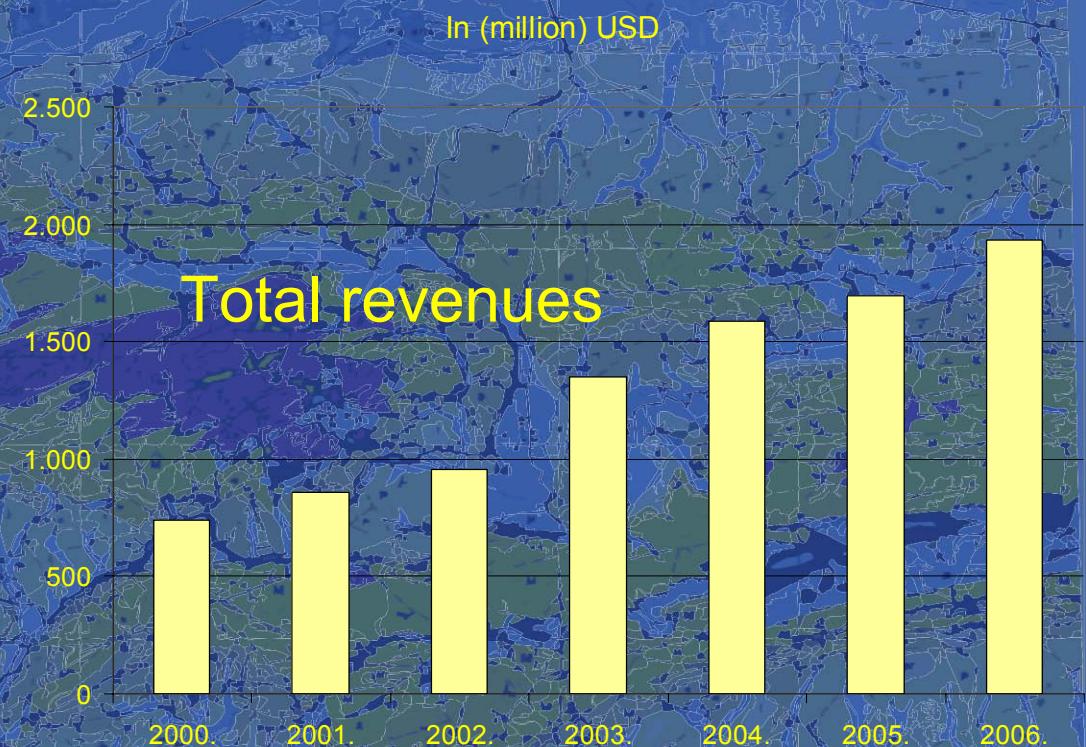

Ljubljana 10/12/2007 - 11/12/2007

HGI-CGS

Non-metalic industry in Croatia(2006)

- 8% of total industrial output
- 700 companies
- 17,000 employees

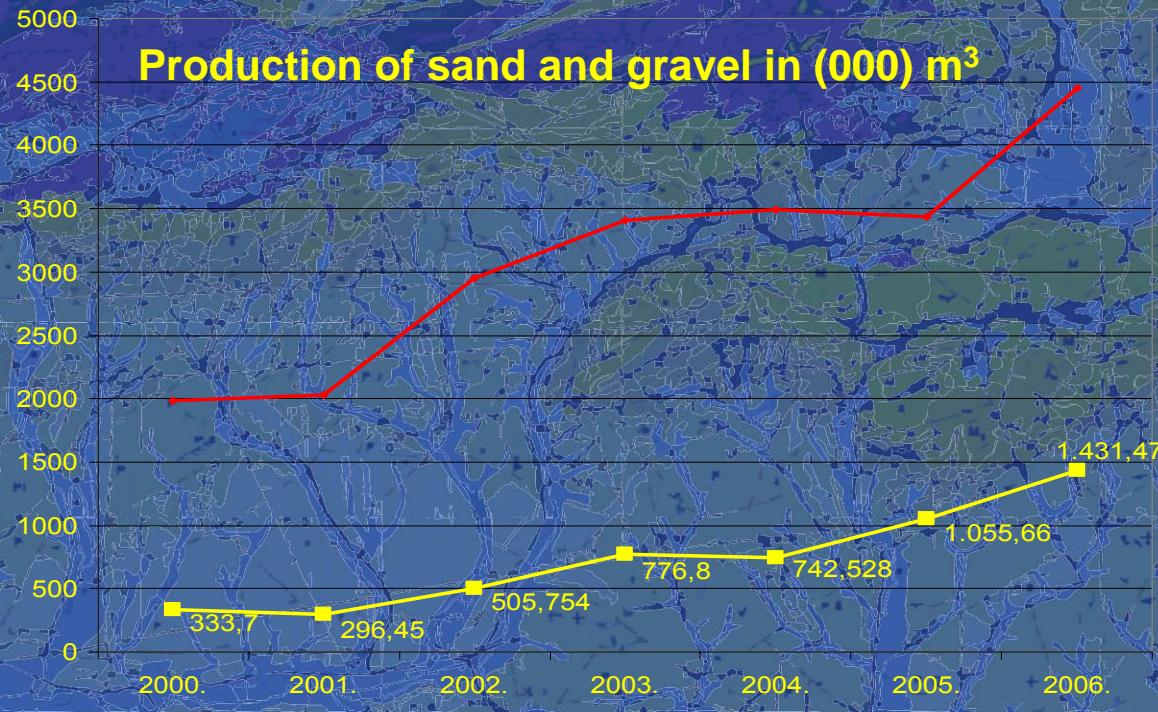

glass industry
cement
bricks and tiles
dimension stone
stone aggregates

Approx. 50% of top manufacturers are internationaly owned companies (Cemex, Holcim, Knauf, Tondach)

Mineral commodities with highest production growth:

- crushed stone aggregate
- dimension stone (limestone)
- sand and gravel
- Has high potential which is not utilized:
limestone and dolomite as industrial minerals

TAIEX event: INFRA 25708 :

— RH u 1 000 m³ ■ VŽ u 1 000 m³

Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.

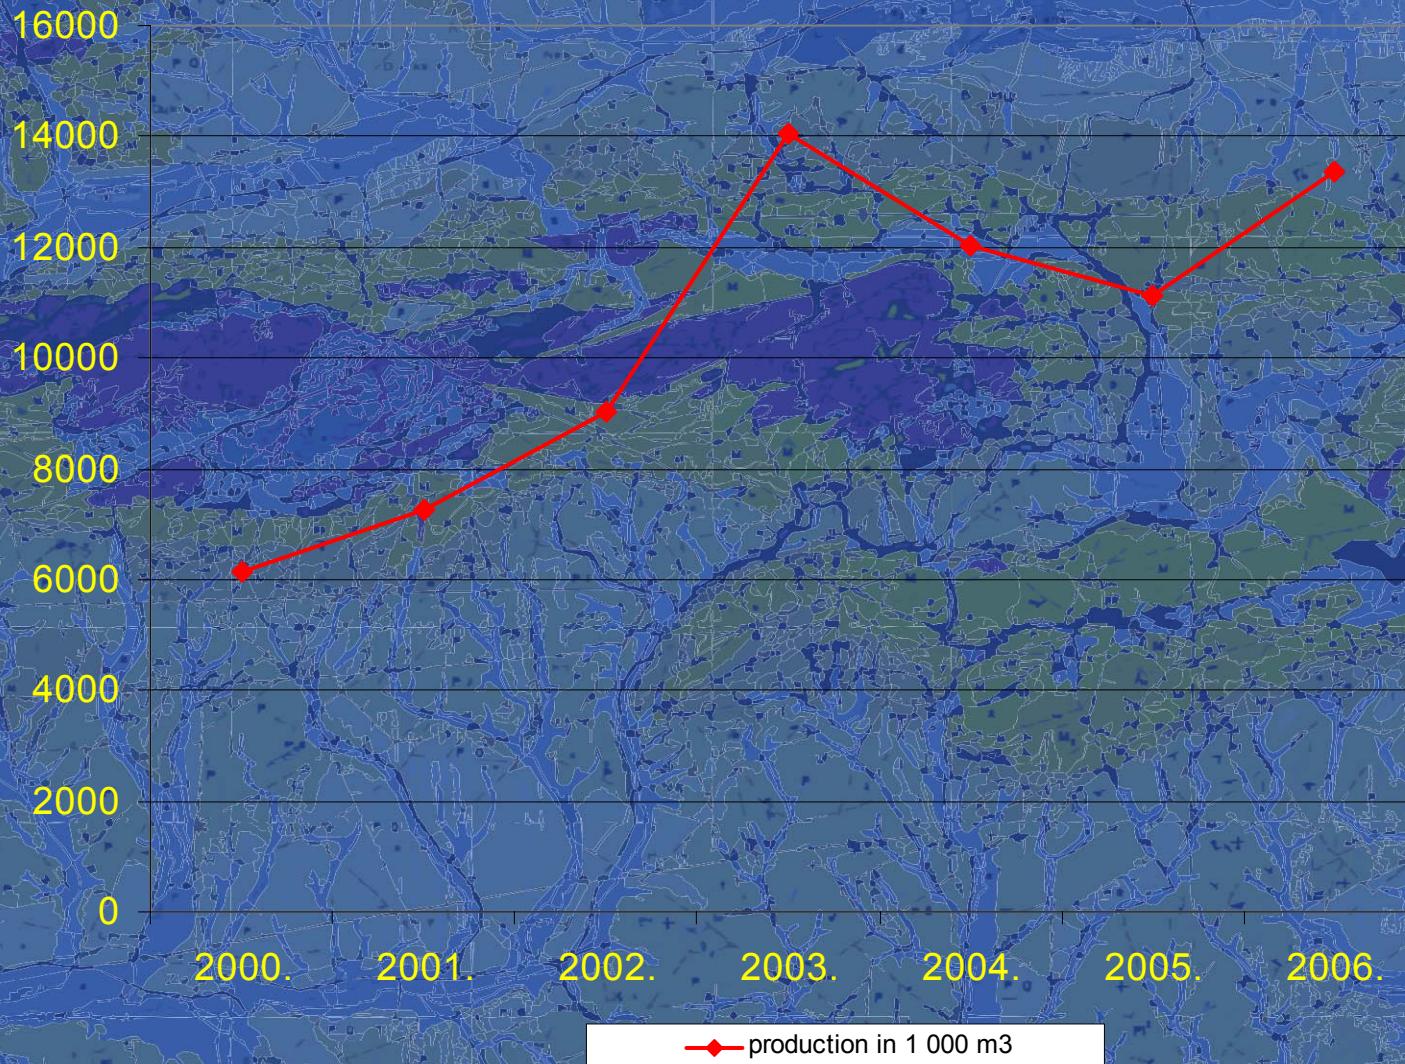

Ljubljana 10/12/2007 - 11/12/2007

HGI-CGS

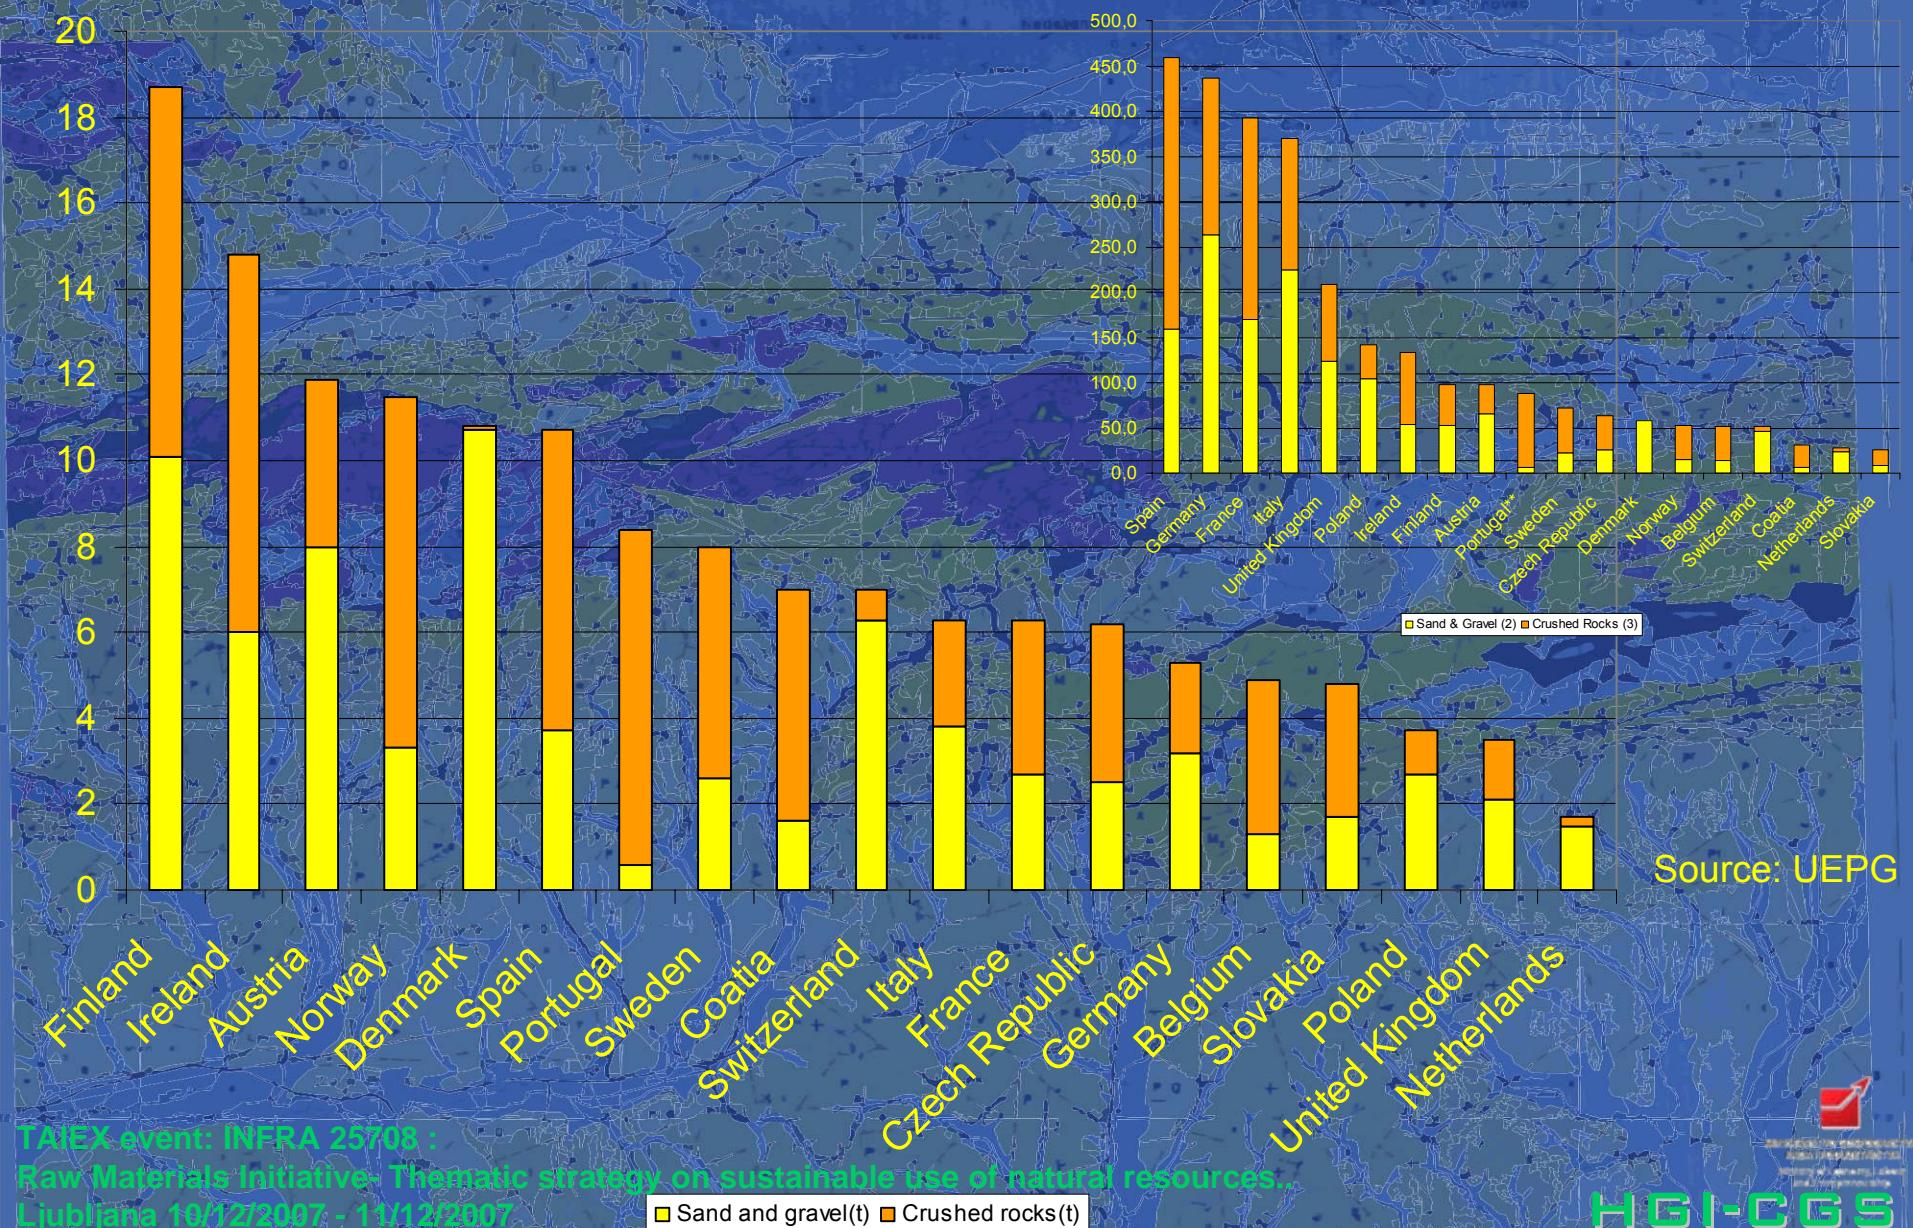

Crushed stone aggregate production

Reserves 30-40 years

The European Aggregates Industry and Croatia

Production per person (t) (population data and production for 2005)

TAIEX event: INFRA 25708 :

Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.

Ljubljana 10/12/2007 - 11/12/2007

■ Sand and gravel(t) ■ Crushed rocks(t)

HGI-CGS

Strategy on sustainable use of natural (mineral) resources in Croatia

Goverment:

Key document “Mineral raw materials management strategy for Croatia” prepared by the **Ministry of Economy, Labour and Entrepreneurship** – first reading in 2005

Local administration (21 Counties) :

County Mineral Resources Development Plans

- Geological mineral resource potential maps (scale 1:100000)
- Data bases of mineral resource sites
- Exploitaion areas
- Production and reserves data
- Environmental protection conditons and restrictions
- Market and development needs
- Restoration recomendations
- Deliniated areas most favorable for extraction sites (areas with mineral commodities not in conflict with other land uses)

TAIEX event: INFRA 25708 :

Raw Materials Initiative- Thematic strategy on sustainable use of natural resources.

Ljubljana 10/12/2007 - 11/12/2007

HRVATSKI GEOLÓŠKI INSTITUT

Strategy on sustainable use of mineral resources in Croatia

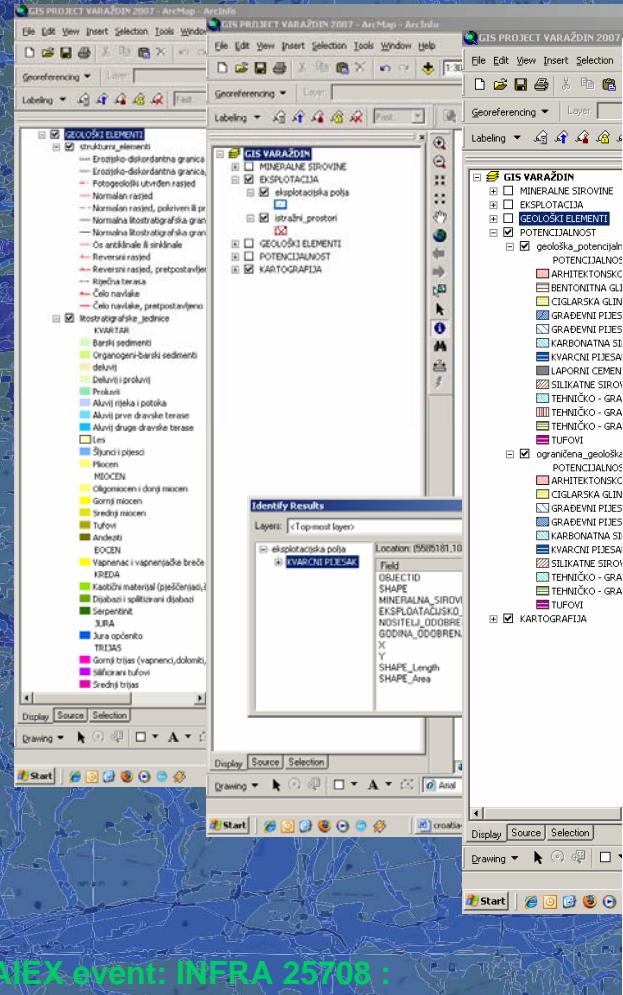

Regional administrations through their
Departments for Spatial planning together with
HGI-CGS or RGN

County Mineral Resources Development
Plans have been finished for 9 counties from
2005 to 2007

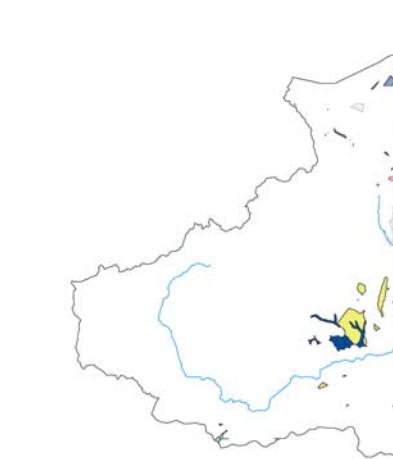

Local administrations:
Restrict gravel and sand production as well as crushed stone
production and favor dimension stone and brick clay production

County Mineral Resource Development Plans

GIS of mineral resources for spatial planning and management

A part of the future: GIS modeling and favorable areas for aggregate extraction

Arc SDM WofE favorability map for aggregate stone extraction:

Šibensko-kninska county - Dalmatia

- road infrastructure
- protected areas
- valuable land
- 1 km distance from the coast
- tourist resorts
- settlements (1000 m distance buffer)
