**COIN HOARDS FROM CROATIA
XVII. THE KRIŽOVLJAN (VARAŽDIN) HOARD OF CELTIC
TETRADRACHMS (1843)**

**UDC 737.122.2 (36:497.5) »1«
Original scientific paper**

In 1843 at the site of Škarje near Križovljan Radovečki, some 17 kilometers NW from Varaždin, along the road Varaždin – Ptuj a hoard of 109 Celtic tetradrachms was found. The authors have collected all the available documentation dealing with this important and much discussed coin hoard and also remind the reader about the legislature of the time dealing with treasure trove and the prohibition of exportation of works of art from the Austrian Empire.

Key words: the Celts, tetradrachms, Varaždin Type, Škarje, Križovljan.

Ključne riječi: Kelti, tetradrahme, varaždinski tip, Škarje, Križovljan.

INTRODUCTION

In 1843 at the site of Škarje near Križovljan Radovečki, some 17 kilometers NW from Varaždin, along the road Varaždin – Ptuj (lat.: 46°22', long.: 16°07'; Figs. 1–2), a hoard of 109 Celtic tetradrachms was found (PINK 1937: 48; MIRNIK 1981: 44, 65; ŠIMEK 1990: 38, 90). This hoard has frequently been mentioned in numismatic literature.¹ Instead of being named after Kri-

1 KENNER 1896: 331; KLEMENC – SARIA 1936: 72; PINK 1937: 48; 1939: 113, 139; 1950: 38, 43; GÖBL 1973: 97–99, 126–127; DUKAT, Z. – I. MIRNIK 1976: 187, 189–190; 1978: 198–199, 205, 207; LIŠČIĆ 1978: 240–244, 250, 255–266, 259, Pl. I, IV; MIRNIK 2008: 120–121, 122.

Slika 2.

žovljan or Škarje, both the Celtic coin type and the hoard itself carry the name of Varaždin (Varasd in Hungarian, Warasd in German; PINK 1937: 43, 45, 48–49, 68, 69, Pl. 1; KLEMENC – SARIA 1936: 72; KOS 1977: 35), the former capital of the Triune Kingdom of Croatia, Slavonia and Dalmatia, because unlike Križovljan, in the Hapsburg Empire, Varaždin was known to everybody. In addition, it was the Varaždin Magistrate to be involved in the entire case and mentioned in all the documents dating from 1843–45.

This has been the case with the two other types and hoards of the so-called Croatian Group: the 1922 Samobor hoard was not undug at Samobor, but in the Jama forest beneath the ruins of the mediaeval Okić Castle, whereas the Đurđevac hoard of 1887 was not found in Đurđevac itself but on the Kostanj hill near Šemovci (Fig. 3).

Figure 3.

Slika 3.

However, in the central archive of the Hapsburgs (*Haus-, Hof- und Staatsarchiv*), established in Vienna in 1749 by Maria Theresia, there are two documents of the *Oberstammeramt* B, Rnr. 374 from 1844 stating, that in the Varaždin region 102 silver coins were found. Of these 10 coins were delivered to the *Münzkabinett* of the *Kunsthistorisches Museum* in Vienna, 20 specimens were presented to the Hungarian *Hofkammer* to be handed over to the scientific institutions in Hungary and Croatia, 22 coins were sold at auction, while the rest of 50 tetradrachms were melted (according to the law of that time):

2064 »... hat die k. ungarische Hofkaemmer hundert zwei stück auf dem Varasdiner städtischen Terrain gefundene und durch das Pester k. k. Gold- und Silbereinlössamt im Ganzen auf 92 f 15 xr geschätzte Münzen anher vorgelegt.«

2129 »... aus 102 St celtischen Silbermünzen bestehenden Funde, welcher auf dem Varasdiner städtischen terrain gemacht wurde, behält das k. k. Münzkabinet 10 Stücke, wofür der Ersatz c. p. a. mit 12 f beiliegt 20 Stücke erhält die kön. Ung. Hofkammer zu Ofen zur beliebigen für die Wissenschaft erspriesslichen Vertheilung so seltener u. merkwürdiger Reste des Altertums an die gelehrten Institute u Lehranstalten Ungarns u. Croatiens. 22 Stücke sind zu Lizitieren, der Rest zu 50 Stück zum Einschmelzen bestimmt.«²

More information – totalling 22 documents, both in Latin and German – is to be found in Budapest at the Hungarian State Archives (*Maygar Országos Levéltár – MOL/Ungarisches Staatsarchiv; Ungarische Kammer, E szekció – E 85. Kt. 164, 4*). In addition more information lies among the documents of the Hungarian National Museum and the Palatine's Archive (No 24), as kindly told by Péter Prohászka: »Zwischen den Akten des Ungarischen Nationalmuseums in dem Palatinischen Archiv (N 24) befinden sich noch einige Akten zu den Münzfunden.

Aus dem Jahr 1844 (Ungarisches Staatsarchiv N 24 Musei Kt. 492 Z. 2092) sind die Akten meistens mit dem Akten aus der Ung. Kammer identisch und eine Ergänzung bedeutet nur, dass mit einem Brief die übrigen Münzen ins Nationalmuseum geschickt wurden.

Aus dem Jahr 1845 (Ungarisches Staatsarchiv N 24 Musei Kt. 493 Z. 85) ist ein Bericht des Custos an Direktor Kubinyi, dass er aus dem Fund von Varasd skarje sechs Stück Münzen für das Museum auswählte.«

This treasure trove caused a considerable turmoil and several high institutions in Vienna, Budapest and Varaždin were involved, and even the Emperor Ferdinand I (IV) (*19.IV.1793 – 1835–1848 +27.II.1875) (Document XI, XIX, XX) and the Hungarian Palatine Archduke Joseph (*9. III. 1776 +13. I. 1847), the brother of Emperor Francis I (*12. II. 1768 – 1792 +2. III. 1835) (Documents VIII, XII, XIX) and the Royal Hungarian Regency Council (Documents VIII, XII) were informed about this case.

In the first half of 1843, most probably in the spring, an unnamed labourer unearthed some 109 silver coins – at first for some unknown reasons considered as Thessalic, and it was only after the coins had been seen in the Imperial and Royal Coin Cabinet in Vienna that they were pronounced to be Celtic – in his vineyard at Škarje, which lay within the territory of the Free and Royal Burgh of Varaždin. There is no mention about the recipient in which the coins might have been buried. These coins were purchased by Jakob Tänzer of Varaždinske Toplice who in his turn sold them to Samuel Edler of Eisenstadt (Železno in Croatian, Kismarton in Hungarian). Both were Jewish. These coins were however confiscated by the Varaždin Magistrate's captain Joseph Tóth, so that Jakob Tänzer had to return the 150 talers to Samuel Edler. In his letter to the Varaždin Magistrate Jakob Tänzer quotes the constitution of Empress Maria Theresia of 23 January 1777, regulating similar treasure troves (Document I).

In those days the treasure trove was regulated by the Codex Theresianus (MIRNIK 1979: 328), completed in draft in 1766, but never approved by the Empress:

»When the owner or his heirs cannot be found, it passes by legal succession, as property to which there is no heir, to the territorial treasury, which takes it as such, wherever found, unless special grants or franchises of such property exist. The use of improper or magical arts is forbidden and punished, valuables found by such means to be confiscated if the real owner cannot be traced. Search, even by proper means, in another's land without the landowner's will, is forbidden. Elaborate rules are given to prevent injury to property, or even to public amenities, during search. Notice

2 We kindly thank Péter Prohászka (Budapest) for the information and documents.

of finding has to be given by the finder and landowner, and delivery made within three days at the court having jurisdiction. Punishment for failure to do this is at the discretion of the court. When delivered, the court must decide whether the find is treasure or merely property lost and found. Claim to treasure must be presented within a year. Finally, no claim being presented or allowed, the treasure is handed over to the fiscus; costs and damage and loss are to be made good to landlord and finder, if report has been duly made; and further, the two together shall receive in equal shares half the treasure according to the valuation of the court; if there is more than one finder, they divide the quarter. If the treasure was found without the landowner's knowledge, he has the full half, the finder nothing. There are further regulations covering cases of divided ownership, of treasure found on sold land before handing over, of land in revocable ownership. When treasure is found in public places by chance or with leave given to search, the finder gets the half-share, unless a reserve was made when leave was granted. When finder as well as landowner have failed to report a find, their share goes to the informer, his name not being revealed. Trifles worth less than 200 Gulden are not to be regarded as treasure.« (HARRAS von HARRASOWSKY 1884: 71–75, § 5, art. 72–105; HILL 1936: 81–82)

There was also another decree of October 25, 1771:

»...all the treasure should be divided into three parts, of which one should go to the treasury, one to the landowner, and the third to the finder, provided that he declares it in full. In case of concealment, his portion is given, in part or the whole, to the man who denounces him; if there is no informer, and he is discovered by other means, his portion is divided equally between the landowner and the treasure.« (HILL 1936: 82)

More legislative regulations dealing with the treasure trove can be found in the Austrian civil code of June 1811 (*ABGB – Allgemeines Bürgerliches Gesetzbuch*) in *Justizgesetzsammlung* (Nr. 946/1811), (<http://alex.onb.ac.at/cgi-content/anno-plus?apm=0&aid=jgs&datum=10120003&seite=00000328&zoom=2>, <http://alex.onb.ac.at/cgi-content/anno-plus?apm=0&aid=jgs&datum=1012003&seite=00000329&zoom=2>).

The relevant paragraphs are quoted here in the original:

§. 395 *Werden vergrabene, eingemauerte oder sonst verborgene Sachen eines unbekannten Eigenthümers entdeckte; muss die Anzeige so, wie bey dem Funde überhaupt, gemacht werden.*

§. 396. *Wird der Eigenthümer aus den äußerlichen Merkmahlen oder andern Umständen entdeckt, so ist ihm die Sache zuzustellen; er muß aber, wenn er nicht beweisen kann, schon ehe Kenntniß davon gehabt zu haben, dem Finder den §. 391 ausgemessenen Finderlohn entrichten.*

§. 397 *In dem Falle, daß sich der Eigenthümer nicht sogleich erkennen läßt, muß die Obrigkeit nach den Vorschriften der §§. 390–392 verfahren.*

§. 398. *Bestehen die entdeckten Sachen in Geld, Schmuck oder andern Kostbarkeiten, die so lange im Verborgenen gelegen haben, daß man ihren vorigen Eigenthümer nicht mehr erfahren kann, dann heißen sie ein Schatz. Die Entdeckung eines Schatzes ist von der Obrigkeit der Landesstelle anzugezeigen.*

§. 399. *Von einem Schatze wird der dritte Theil zum Staatsvermögen gezogen. Von den zwei übrigen Drittheilen erhält Eines der Finder, das andere der Eigenthümer des Grundes. Ist das Eigenthum der Grundes getheilt, so fällt das Drittheil dem Ober= oder Nutzungseigenthümer zu gleichen Theilen zu.*

§. 400. *Wer sich dabey einer unerlaubten Handlung schuldig gemacht; wer ohne Wissen und Willen des Nutzungseigenthümer den Schatz aufgesucht; oder den Fund verheimlicht hat; dessen Anteil soll dem Angeber; oder, wenn kein Angeber vorhanden ist, dem Staate zufallen.*

§. 401. Finden Arbeitsleute zufälligerweise einen Schatz, so gebühr ihnen als Findern eine Drittheil davon. Sind sie aber von dem Eigenthümer ausdrücklich zur Aufsuchung eines Schatzes gedungen worden, so müssen sie sich mit ihrem ordentlichen Lohne begnügen.

The English translation of the Austrian Civil Code, published in 1866, also contains these paragraphs:

»§. 395 *If things belonging to an unknown proprietor, which have been buried, walled in or otherwise concealed, are discovered, notice must be given the same as on finding things in general.*

§. 396. *If the proprietor is discovered by the outward marks or other circumstances, the thing is to be delivered to him; but he must, if he cannot prove, that he already had a knowledge of it, before, pay the finder the reward for finding, fixed in §. 391.*

§. 397 *In case the proprietor is not to be recognized immediately, the authority must proceed according to the dispositions of §§. 390–392.*

§. 398. *If the discovered things consist of money, jewellery or other precious things, which have been so long concealed, that their former proprietor can no longer be discovered, they are then called treasure. The authority has to give notice of the discovery of a treasre to the government of the province.*

§. 399. *The third part of a treasure is confiscated as the property of the state. Of the two remaining thirds the finder receives one, the proprietor of the ground the other. If the property in the ground divided, the third part falls to the lord paramount and usufructuary proprietor in equal shares..*

§. 400. *Whoever on such an occasion becomes guilty of unallowed act; whoever has sought for the treasure without the knowledge and consent of the usufructuary proprietor; or has concealed the finding; his share falls to the denunciator; or, if there is no denunciator, to the State.*

§. 401. *If workmen find a treasure by chance, they are entitled as finder to a third part of it. But if they have been expressly engaged by the proprietor for the purpose of searching for a treasure, they must concnet themselves with the common wages.« (WINIWARTER 1866: 87–88).*

These regulations were also in force in the Kingdom of Croatia and Slavonia:

b) stvari skrivenih;

§. 395. *Ako se otkriju stvari nepoznatoga vlasnika zakopane, uzidane ili inače sakrivene, ima se to javiti na isti način, kao što je naređeno pri nalasku u opće.*

§. 396. *Ako bi se poznao vlasnik po biljezima izvanjskim ili po imim okolnostima, ima mu se dostaviti stvar; ali dužan je dati nalazniku nalježbu određenu u §. 391., ako ne uzmogne dokazati, da je još prije znao, gdje se nahodi stvar.*

§. 397. *Ako se vlasnik ne bi odmah mogao poznati, poglavarstvo postupa po propisima §§. 390–392.*

c) blaga.

§. 398. *Ako stvari otkrivene sastoje u novcu, nakitu ili inim dragocjenostima, koje su tako dugo ležale sakrivene, da se njihov prijašnji vlasnik više saznati ne može, tad se zovu one blago. Otkriće blaga javit će poglavarstvo mjestno načelstvu zemaljskomu.*

§. 399. *Treći dio blaga pripada državnoj imovini. Od ostale dvije trećine jedna je nalaznika, a druga vlasnika zemljista. Ako je vlasnost zemljista podijeljena, trećina pripada na jednake dijelove vlasniku vrhovnomu i koristovnomu.*

§. 400. *Tko se u otkriću blaga učinio krivcem nedopoštenoga kojega djelanja; tko je bez znanja i volje vlasnika koristovnoga potražio blago ili zatajio nalazak, dio njegov pripast će opovedniku, ili ako nema njega, državi.*« (PLIVERIĆ 1900: 180–181).

Another royal decree of November 1812, No. 30227/2061 specified that all undug treasures should be given to the Imperial and Royal Coin Cabinet for inspection and selection (Document IV).

Following upon the widely spread massive pillage of works of art by Napoleonic troops, the Imperial and Royal Court Chancellery issued a decree on December 28, 1818, No 30182 prohibiting any export of excavated archaeological items:

»124. Bestimmungen ueber die Ausfuhr und den Verkehr mit Kunswerken und Seltenheiten.

Seine Majestät haben mit höchster Entschliessung vom 19 September und 23. November 1818, über die Ausfuhr und den Verkehr mit Kunswerken und Seltenheiten folgende Bestimmungen zur genauesten Nachachtung festzusetzen geruhet:

1. *Es sey von nun an in dem ganzen Umfange der Monarchie verbothen, Gemählde, Statuen, Antiken, Münz= und Kupferstich=Sammlungen, seltene Manuskripte, Codices und erste Drucke, überhaupt solche Kunst= und Litteratur=Gegenstände auszuführen, welche zum Ruhme und zur Zierde des Staates beytragen, und durch deren Veräußerung in der Masse der übrigen in der Monarchie vorgandenen Gegenstände dieser Art eine schwer zu ersetzende Lücke und ein wesentlicher Verlust entstehen würde.*
2. *Ein Versuch der Ausschwärzung solcher Kunstschatze werde mit der Confiscation des auszuführenden Gegenstandes, und eine wirklich Statt gehabte Ausfuhr mit Erlegung des doppelten Werthbetrages des außer Landes gebrachten Kunstwerkes bestraft werden.*
3. *Da es nie in der Absicht der Stattswiraltung liegen könne, lebende Künstler in ihrem rechtmäßigen Erwerbe zu beschränken, ihnen die Mittel zu höherem Verdienste und Gewinne zu benehmen, und dem Kunstfleiß auf irgend eine Weise Fesseln anzulegen; so versthe es sich von selbst, dass diese beschränkenden Verfügungen sich keineswegs auf Werke lebender Meister beschränken dürfen.*
4. *Um den Besitzern der mehr gedachten Gegenstände ein hinlängliches Feld offen zu lassen, mit ihrem Eigenthume zu verfügen, werde der freye Verkehr im Innern der Monarchie, und daher auch der Verkauf und Ausfuhr derselben aus einer Provinz in die andere frey und ungehindert gestattet.*
5. *Die Entscheidung der Frage: ob ein oder der andere Kunst= und Litteratur=Gegenstand unter die Zahl derjenigen zu rechnen sey, deren Ausfuhr verbothen ist, stehe der Landestelle nach Einholung des Gutachtens derjenigen Akademie der bildenden Künste oder Bibliothek=Direction zu, deren Wirkungskreis sich auf jene Provinz erstrecket.*
6. *Die Früheren Verordnungen über diesen Gegenstand sind aufgehoben.*

Hofkanzley=Decret vom 18. December 1818, an sämmtliche Länderstellen.

Kundgemacht in Nieder=Oesterreich und Böhmen, am 2.; in Illyrien, am 5.; in Mähren und Schlesien, am 11.; am Küstenlande, am 13. Februar 1819.³

This decree was repeatedly issued by both the Royal Territorial Croatian-Dalmatian-Slavonian Government on November 25, 1880 and the Imperial and Royal Military Headquarters as the admi-

³ <http://alex.onb.ac.at/alex.htm>. We kindly thank Professor Dalibor Čepulo of the Zagreb University Faculty of Law for help.

nistration of the Military Border, on June 12, 1880. It explicitly said that any export of antiquities, collections of old coins etc., in fact any antiquities and items of particular interest for science and arts, which could with difficulty be replaced, was prohibited. If something similar occurred, unless the items were confiscated, the offender ought to be fined. Subsequently an act of the High Imperial and Royal Court Chancellery of June 14, 1846, No. 19704 is quoted, by which the state relinquishes the ownership of one third of the archaeological items found, which it has the right to according to the § 399 of the Civil Code, but all other paragraphs obliging the political authorities to inform the Royal Government immediately of any such discovery (and the Government itself must immediately inform the Territorial Museum about these discoveries) – 395, 396, 397, 400, remain valid:

»Obnova

Starih zakona i naredba od strane Vis kr. zem. Vlade i od strane Vis. c. kr. glav. Zapovjedničtva u Zagrebu kao kraj. zem. upr. oblasti u pogledu izvažanja starina iz naše zemlje i njihova sačuvanja.

Kr. hrv. slav. dalm. zem. Vlada.

Odjel za bogoštovje i nastavu.

Br. 3302.

Dostavlja se ravnateljstvu arkeologičkoga odjela narodnoga muzeja u Zagrebu u riešenju izveštja od 20. lipnja t.g., br. 85. znanja radi.

U Zagrebu 25. studenoga 1880.

Za bana: Dr. Muhić

I. Svim kr. podžupanijam i II. svim gradskim poglavarstvom.

Pošto se je opazilo, da su neke dragocjenosti arkeologičke vrednosti s neopreznosti dotične političke oblasti odnešene izvan zemlje, obraća se pozornost kr. podžupanije (grads. poglavarstva) na br. 47 točku 4 dodatka k hrvatskomu izdanju obćega gradjanskoga zakonika i na otpis dvorske kancelarije od 28. prosinca 1818. br. 30182, kojimi je zabranjeno izvadjanje nadjenih dragocjenosti arkeologičke vrednosti, ter se ima kazniti i sam pokušaj izvoza plienitbom, a obavljeni već izvoz globom u dvostrukoj vrednosti blaga.

Po smislu ovih ustanova i odpisa dvorske kancelarije od 15. lipnja 1846 br. 19704 nalaže se kr. podžupaniji (grads. poglavarstvu), da u buduće strogo nad tim bdije, da se nadjene starine na kupu drže i nerazdadu, prodadu ili snište prije, nego stigne naredba kr. zemaljske Vlade na izveštje, koje se ima u takovom slučaju odmah ovamo podnjeti.⁽⁴⁾

—.—

C. kr. glavno zapovjedničtvo u Zagrebu

kao krajiška zemalj. upravna

Oblast. Odiel za nastavu br. 1566

U Zagrebu, 12. lipnja 1880.

⁴ Po odpisu Vis. c. kr. dvorske kancelarije od 28. prosinca 1818 br. 30182/2764 zabranjeno je izvažati iz zemlje starine, sbirke starih novaca i t.d. sve naime, što je staro i osobito za znanost i za umjetnost, i čemo bi se težko naknadni moglo. Dogodi li se što takova, i nebude li moguće predmete uzaptiti, onda prestupnik neka se globom kazni. Po odpisu pako vis. c. kr. dvorske kancelarije od 15. lipnja 1846 br. 19704 odredjuje de, da se država zahvaljuje na trećinu našastih arkeol. predmeta, što joj po §. 399 grad-

jans. zakonika pripada, ali da i nadalje ostaju valjane sve ostale odredbe u §§. 395., 396., 397. i 400 istoga zakonika sadržane, te da su političke oblasti dužne o svakom odkriću obavijestiti namah zem. Vladu, kojoj opet dužnost staviti to do znanja zem. muzeju; i da nadalje traje valjanost c. kr. odluka ob ovom predmetu izdanih, imenito ona od 19. rujna 23. prosinca 1818 priobćena odpisom c. kr. dvorske kancelarije od 28. prosinca i g., gori navedena.

Slavnom ravnateljstvu arkeol. odjela zem. muzeja.

Prema želji izraženoj u vijenjenom dopisu od 25. travnja t. g. br. 58 razaslala je ova krajška zem. uprav. oblast podjedno na sve podčinjene političke oblasti naredbu, kojom će se prepriječiti u ovom području u buduće za zem. muzej gubitak pronadjenih u obsedu sadašnje Krajine starina, ter se u prilogu dostavlja sva. Ravnateljstvu i prijepis ove naredbe na blagovoljnu daljnju uporabu.

Phillipovich, FZM.

C. kr. kotarskoj oblasti (ili gradskom poglavarstvu) u

U Zagrebu, 12. lipnja 1880.

Ravnateljstvo arkeologičkog odjela zemaljskog muzeja u Zagrebu zamolilo je ovo glavno zapovjedništvo kao krajšku zem. upr. Oblast prilikom, gdje su neke dragocjenosti arkeološke vrednosti s neopreznosti dotočne političke oblasti prošle van naše zemlje, da se shodnim mjerama predusretne sličnim dogodovštinam. Povodom ovim upozoraju se sve podčinjene političke oblasti, da je brojem 47. člankom 4 pridjevka u hrvatskom izdanju gradjanskog zakonika i odpisom dvorske kancelarije od 28. prosinca 1818. br. 30182 zabranjeno izvažanje nadjenih dragocjenosti arkeološke vrednosti, ter da se kazni i sam pokušaj izvoza zapljenom, a obavljeni već izvoz globom u dvostrukoj vrijednosti blaga. U smislu ovih ustanova i odpisa dvorske kancelarije od 15. lipnja 1846 br. 19704 imati će u buduće kotarske oblasti i gradska poglavarstva na to oštro bдiti, da se starine pronadjene na kupu drže i ne razdadu ili uniшte prije, nego dodje odredba na izvještaj, koji se ima u takovu slučaju umah podnjeti ovoj krajškoj zemaljskoj upravnoj oblasti.

Naredba ova ima se u vlastitom području točno proglašiti.⁵

The previously mentioned letter by the Austrian Court Chancellery of 1846 can also be found in Croatian translation in the Archives of the Zagreb Archaeological Museum:

»Hrvatski prevod propisa

(iz uredovnog lista k. aust: c. povlašćenim bečkim novinam pod brojem 203. od subote dne 25. Srpnja 1846:)

Br. 2229

Razpis

c. kr. zemaljske vlade u nadvojvodini austrijskoj pod Ensom

U pogledu na propise tičuće se postupanja drevnih (starovjekih,) zatim novčanih i drugih starinarskih nalazinah.

Da se s jedne strane uklone preprijeke, koje se, kako izkustvo pokazuje, pri rabljenju obstojećih propisah o postupanju drevnih nalazinah dogadjaju, s druge pak strane, da se objavlјivanje i uzdržanje novčanih i inih starinarskih nalazinah u interesu umjetnosti i znanosti unapriedi, izvolilo je Nj. c. kr. veličanstvo, uslied podane visoke odluke c. kr. dvorske kancelarije mjeseca lipnja t.g. pod dvorskim br. 19704-834, po sadržaju jednog na dvorskiju komisiju za karne stvarni poslanog najvišjega riešenja od dne 31. Ožujka 1846. sledeće ustanove naznačiti:

1. *što se blaga u obće, dakle takodjer drevnih nalazinah tiče, to će odsele odpasti trećina, koja je po § 399. obćega gradjanskoga zakonika državnomu odboru pripadala; blago se ima*

5 The Zagreb Archaeological Museum Archives, Box No. 34.

dakle bez odbitka one trećine na jednake diele porazdiljeni medju našastnikom i vlasnikom zemljista, a u slučaju podijeljene zemljistične svojine ima se dio, pripadajući vlasniku zemljista, podijeliti medju pravim vlasnikom i najamnikom (ili zakupnikom)

2. *Ustanove §§ah 395. 396. 397 i 400 obćega gradjanskog zakonika ostaju medjutim takodjer glede blaga u drevnih nalazinah valjane, no se ima odustati od pošiljanja, po dojakošnjih propisih naznačenoga, takovih za znanost važnih stvari na javne sbirke kao takodjer i od prava njihova unapredkupovanja.*
3. *Dužnost je političkih vlastih, o nalazinah novčanih i drevnih stvari, koje bi za znanost ili umjetnost važnost imale, izvjestiti političku zemaljsku last, da ova izvesti zavode i družtva, koja za takove stvari obstoje.*
4. *Ovim sadašnjim zakonom neće se ništa promjeniti na propisih objavljenih dvorskom odlukom od dne 8. Prosinca 1818. dvorski broj 30182-2764, 1818 najviših riešenja od dne 19. Rujna i 23. Studenoga 1818, što su razpisom c. kr. d. austr. vlade do znanja stavljena.*

(: izvadjenog iz spisah c. kr. kabineta za novce i starine od godine 1846. br. 93)

C. kr. spojena dvorska kancelarija izvestila je od dne 14. Kolovoza 1846. br. 23154/1275. sve zemaljske vlade, da čim većma nadziru pojavivše se nalazine starinskih stvari, o važnijih da izvesti c. kr. kabinet za novce i starine, i da našastnike, u koliko je samo bez nagona moguće, prinukaju, da osobito važne stvari, ako se lahko poslati mogu, pošalje.

Ovo se ravnateljstvo c. kr. kabinetu za novce i starine uslijed riešenja podnešenog izviešća od 30. Lipnja t. g. do znanja daje.

Dietrichstein s.r.

Od c. kr. vrhovnog komorskog ureda

U Beču dne 29. Kolovoza 1846.

Baron Sacken.⁶

These regulations were included in the Austrian Civil Code, as proclaimed by the royal patent of November 29, 1852 for the Kingdoms of Croatia and Slavonia:

»Da se doskoči teškoćama koje su se po iskustvu rađale, kad su se uporavljali propisi postojeći o postupanju s nalazima arheološkim, a tako i u namjeri, da se u interesu umjetnosti i znanosti čim bolje doznadu i sačuvaju numizmatični i drugi antikvarni nalazi: dosta jalo je Nj. Veličanstvo po sadržaju previšnje odluke od 31. ožujka., izdate na dvorsku komisiju u stvarima pravosudnih, i priopćene po kancelariji dvorskoj, narediti ustanove slijedeće:

1. *U obziru blaga u opće, dakle i u obziru nalaza arheoloških ukida se od sada trećina, koja po §. 399. općega građ. zakonika pripadala imovini državnoj; ima se dakle blago bez odbitka*

⁶ The Zagreb Archaeological Museum Archives, Box No. 34.

ove trećine raspoloviti na jednake dijelove između nalaznika i vlasnika zemljišta, a ako je vlasništvo zemlje radijeljeno, ima se onaj dio, koji pipada vlasniku zemljišta, razdijeliti između vlasnika vrhovnoga i koristovnoga.

2. *Ustanove §§. 395., 396., 397., i 400. operga građanskoga zakonika ostaju u krijeponst i glede blaga i arheoloških nalaza, ali prestati ima, što se dosadašnjim propisima naređivalo, da se t.j. takovi za znanost važni predmeti šalju u javne zbirke, a prestati ima i svako pravo prekupa.*
3. *Dužnost je vlasti političkih, o nalazima predmeta numismatičnih i arheoloških, koji važni mogu biti za znanost i umjetnost, izvješćivati političku vlast zemaljsku, za da ova učini, što je potrebno, da se obavijeste javni zavodi ili društva, postojeća za predmete takove.*
4. *U propisima u obziru izvoženja predmeta umjetnosti, a navlastito u previšnjim odlukama od 19. rujna i 12. posinca 1818., koje su izdate dekterom dvorske kancelarije od 28. prosinca 1818. br. 30182 i okružnicom gubernijalnom od 2. veljače 1819. br. 5181, ovim se zakonom ništa ne preinachaće.» (Dekret dvorske kancelarije od 16. lipnja 1846. Dod br. 47). (PLIVERIĆ 1900: 131)*

Out of the mentioned 109 specimens, one coin was halved and melted down by the local goldsmith Joseph Haller, in order to find out the metal quality. Thus the hoard weighed 81 lots and its estimated value amounted to 105 florins and 18 kreuzer (Document II), or two pounds, and 4 1/2 ounces (lots), as put in another document (V). The Royal Hungarian Tax Office estimated the hoard to 92 florins 45 kreuzer (Documents X, XI).

In the end 102 specimens remained to be shown to the Vienna Coin Cabinet, and respectively to the Royal Hungarian Chamber, because the Varaždin Magistrate had sent only two specimens to the Royal Hungarian Court Chamber for inspection, one was given to the archives of the local royal grammar school, three went to the archives of the Free and Royal Burgh of Varaždin and two to the Croatian National Museum in Zagreb (Documents V, VI, VII, XI, XII, XIII, XVII, XIX). The Varaždin Magistrate was reprimanded for not following the existing legal normatives in such cases and asked that such abuse should not be repeated in the future. The exculpatory circumstances were that none of the coins ended up in private hands and that no coin left the Croatian Realm. Therefore the Court rescript issued in Vienna on November 23, 1844 No. 43.570/660 renounced to the already distributed 7 specimens (Document XX). The Vienna Cabinet retained and paid for 10 specimens (Documents XX, XXI, XXII), the 92 remaining coins and 12 florins were sent back to the Royal Tax Office in Buda. Back in Buda some of the coins were given to the National Museum and the Royal University of Science in Pest (Document XXI, XXII).

Out of this coin hoard, today there are 16 coins in the Archaeological Museum in Zagreb, 9 tetradrachms are kept in the Münzkabinett of the *Kunsthistorisches Museum* in Vienna (originally 10 specimens were selected in 1844 and 12 florins were paid for them – Document XX, XXI, XXII) and 10 coins in the *Magyar Nemzeti Múzeum* (Hungarian National Museum) in Budapest.⁷ Altogether 35 silver coins of the hoard could be documented (34,3 % of the original composition).

The Zagreb tetradrachms were included by Šime Ljubić in his catalogue of the Numismatic collection (LJUBIĆ 1890: 40–42, 3–16, P. 2,3), but their weights differ from the actual ones and therefore cannot be identified with certainty. Ljubić had one tetradrachm put on the plate (Fig. 4) depicting various Celtic coins from the Zagreb collection (Fig. 6), of which the cliché has been

⁷ We are gratefully indebted to Melinda Torbágyi (Budapest) and Klaus Vondrovec (Wien) for photographs and relevant data.

preserved (Figs. 5, 7). Upon his arrival to the Zagreb National Museum Archaeological Department, Josip Brunšmid started new inventory books and files (Figs. 8–9), therefore the Varaždin A and B types received the inventory numbers 898–916 and 5771 in the inventory of the Greek coins. Tetradrachms from the Križovljan hoard are on display in the permanent numismatic (DUKAT – MIRNIK 2004: 60–61; 2008: 60–61) and prehistoric exhibitions of the Zagreb Archaeological Museum, and two specimens (Varaždin A, B) were also shown at the *Keltenmuseum* in Hochdorf within the frame of the exhibition »*Dreitausend Jahre Vorgeschichte. Meisterwerke der Metallzeit im kontinentalen Kroatien*« in 2008–2009 (MIRNIK 2008: 120, 190, nos. 121–122).

Individual specimens of the Varaždin type must have existed in some of the European coin cabinets and collections prior or after the discovery of the Celtic coin hoard at Križovljan. Thus for instance there are such tetradrachms at Joanneum in Graz (PICHLER 1865: 149, 19, T.III,19), the Cabinet des Médailles in Paris (MURET – CHABOUILLET 1889: 235, 9912; DE LA TOUR 1892: Pl. LI, 9912), at the *Schweizerisches Landesmuseum* in Zürich (CASTELIN 1976: 118, 1174–1186; 198, 1174–1186), also in the Count Miklós Desseffy (1910: 11, Pl. III, 82) and the Ernst Prinz zu Windisch-Grätz (FIALA 1900: (203, 2841–2843, Pl. III, 2841) collections. In the Zagreb Archaeological Museum Numismatic collection there are specimens of the Varaždin B type of provenance different of the Križovljan hoard: Inv. Nos. 898 (found in Sisak/Siscia, from the Franjo Dierich collection, purchased in 1864), 909 (from Križevci, from the senator and novelist August Šenoa collection, bought in 1898), 915 (from the territory of the Ogulin Regiment, purchased from the merchant Franjo Ritz of Vaganac in 1870).

This coin type has also frequently been discussed and classified in numismatic literature, starting with Karl Pink (PINK 1937: Pl. I,1; 1939: 139, 154; 155, Pl. XXVII,552; 1950: Pl. VII,105) and continuing with Göbl (1973: Pl. 10–21).

CATALOGUE

The coins and their dies in the catalogue are determined according to Göbl (TKN).

The catalogue lists the following in horizontal order: catalogue number, weight, die position, inventory number (BP = Magyar Nemzeti Múzeum, Budapest; ZG = Arheološki muzej, Zagreb; W = Kunsthistorisches Museum, Wien), publication.

Varaždin A

COMPOSITION OF THE HOARD

On basis of only 32 % of the original hoard, of which 46 % has already in 1844 been officially melted, it can be stated that in the hoard the earliest tetradrachms of the so-called »Tauriscan group« were represented (GÖBL 1973; 1994: 37). The hoard consisted of tetradrachms of Varaždin A type (3 specimens are preserved), Varaždin B type (31 coins preserved) as well as »Augentyp-Stamm« type (1 specimen is saved).⁸ Because of the legislative policy of the time that only the coins represented in multiple specimens should be melted down, it can with great certainty be assumed that the original composition of the hoard can still be perceived through documented coins.

TECHNICAL ASPECTS

Varaždin A type

In TKN the evidence of 14 coins of type Varaždin A that were minted with 8 obverse dies and 11 reverse dies (1 : 1.37 ratio) was presented.

The coins in the hoard show for the most part no particularity in comparison to the specimens of this type published by Göbl. The exception is coin no. 4 which seems to represent the link between Varaždin A and B types. Its obverse was minted with the obverse die 24 with which the minting of coins of Varaždin B type commenced (GÖBL 1973: Taf. 20). The reverse, however, still shows all characteristics of coins of group Varaždin A (see the specific position of horse's right side legs that is distinctive on reverse dies 75, 77A or 8; GÖBL 1973: Taf. 19). Die used for its reverse minting was already blurred and was not documented till today.

Varaždin B type

Göbl provided evidence for 40 coins of Varaždin B type minted with 6 obverse dies and 9 reverse dies (1 : 1.5 ratio). The Križovljjan hoard is offering 14 additional specimens of this type that were inaccessible to Göbl when writing TKN.

To mint 30 coins of Varaždin B type in the documented rest of the hoard 4 obverse dies and 5 reverse dies were used (1 : 1.25 ratio).

⁸ The inventory books in Vienna Coin Cabinet are placing this coin in Varaždin (= Križovljjan) hoard of 1843. According to Günther Dembski this coin shows the same

patina as other coins from the hoard of Križovljjan. We are indebted him for this information.

Following Göbl's die sequence the die linkage of coins documented in TKN would be presented as follows:

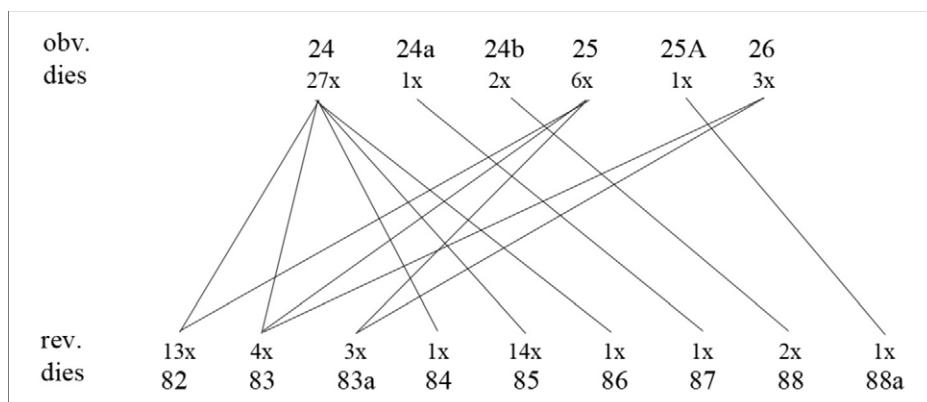

Fig. 1. The die linkage of 40 coins of type Varaždin B as documented by TKN (following Göbl's sequence).

At first sight this scheme shows somehow illogical die linkage sequence showing die links that span too broad from one die to the other.

The analysis of dies in this group of coins further suggests however, that die sequence in this group of coins as proposed by Göbl cannot always be followed. Die linkage as well as average weights (fig. 3) show that obverse die 24 was first used and was followed by obverse dies 25 and 26. The specimens nos. 32 and 33 are the latest minted in group of coins of Varaždin B type represented in the hoard. This can be assumed not only because of their low weight but also on ground of their particular obverse depiction that must have followed die 25. This rather worn obverse die must have followed the obverse die 25 with the same number of dots (21/21) in the upper and lower line of the diadem. On coin no. 33 the obverse die is combined with reverse die that shows already characteristics of early coins of Đurđevac type (above all specific hooves) what furnishes further evidence for very late use of this obverse die.

In spite of assumption of Göbl that obverse die 24a (not represented in the hoard) is a »bad re-cutting« of obverse die 24 (GÖBL 1973: 99), its use must have followed the use of obverse dies 25 and 26 and not directly the use of die 24. That could imply the simultaneous use of several dies.

Since obverse die 24b (not part of the hoard) was produced by re-cutting die 24a it must be the immediate successor of the former. It should be noted that already Göbl has believed that the production of coins with the obverse die 24b should be placed at the end of minting coins of Samobor/C 14 type (GÖBL 1973: 99 -somewhere near obverse die 90).

It was reverse die 84 with whom the minting of Varaždin B type must have commenced and it was followed by the reverse die 85. The horse on the reverse die 84 is still showing characteristics of horse on Varaždin A type (typically high lifted right front leg, clearly executed nostrils; compare the reverse die 75). The obverse die 24 is namely less worn when used in combination with reverse dies 84 and 85 than in combination with reverse die 82 which must have been used subsequently. The assumption is further supported by the higher average weight of coins minted with reverse dies 84 and 85 (see Fig. 3 – [coins with reverse dies 84 are in average 6% heavier than coins minted with obverse dies 82]).

Göbl's reverse die 83a (according to him »slight re-cutting of die 83«; GÖBL 1973: 99) is actually reverse die 83 since it shows no differences in die execution (compare, for instance, no. 31 – Göbl's reverse die 83a – with no. 12 of the hoard). The horse on this die shows a short trunk and only a small distance between left front leg and right hind leg.

The detailed analysis of Göbl's reverse die 86, documented only in one specimen (GÖBL 1973: 99; pl. 21, no. 27), implies the assumption that the coin was actually struck with the reverse die 83.

Coins in the hoard nos. 32 and 33 should be singled out since they were minted with obverse and reverse dies not documented by TKN.

Our proposal of sequence of use of obverse and reverse dies for minting coins of group Varaždin B and their die linkage (coins from TKN and new specimens from the hoard – 54 coins in all – are taken into account) is therefore the following:

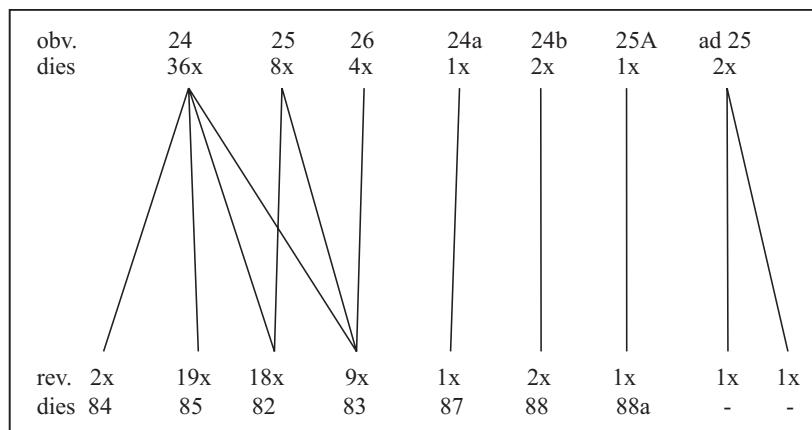

Fig. 2. The die linkage of coins of type Varaždin B as documented by TKN and Križovljan hoard (our proposal).

7 obverse dies and 9 reverse dies (1 : 1.3 ratio) were used to mint 54 coins.

The analysis of dies of coins of Varaždin B type shows their distinctive intertwining implying almost simultaneous production of all coins of this group that must have occurred in a very short span of time in one production centre.

The following figure 3 presents the average weights of coins of Varaždin B type minted with different die combinations.

All coins in the hoard show hardly any signs of wear due to circulation implying rather quick hoarding after their minting.

Križovljan hoard			TKN		TKN + hoard (47 coins with weight data) ⁹

Fig. 3. Average weights of coins of group Varaždin B type in the hoard and in TKN
(47 coins are taken into consideration).

CHRONOLOGY

Coin of Varaždin A and B types are the very first minted in the so called »Tauriscan« group.

The publication of Haimburg hoard (discovered in 1972) brought to light 206 specimens of coins of *Kugelreiter* type (GÖBL 1989), and when later some further specimens from the hoard appeared on the market, this type of coins increased to at least 230 specimens.¹¹ In the hoard additional 32 tetradrachms of the »east Norican = Tauriscan«¹² VES. type were documented¹³ what gives the hoard of Haimburg further significance. Tetradrachms of this type are the oldest in the hoard and with them the minting of coins in both groups (»Norican« and »Tauriscan«) commenced. (GÖBL 1989: 33 ss). Since the coins of Varaždin A and B type are not represented in the hoard, the

9 TKN specimens with respective data and coins from the hoard that were not considered by TKN are taken into consideration.

10 The correct weight is 11.17 g.

11 Seven specimens documented by SCHRETTNER 1993: 287–288. GORINI 2005: 153–155 (Appendice II) presents evidence for a further 17 coins.

12 GÖBL 1973 was dividing the minting into »west-Norican« and »east-Norican«. Later (GÖBL 1994: 37) he was determining the »west-Norican« group as the coinage of Norici and the »east-Norican« group as the coinage of Taurisci.

13 GÖBL 1989: cat. nos. 208 – 237 (30 specimens). SCHRETTNER 1993 : 287–288 (publishing two specimens that were not taken into account by Göbl).

group with the Venetic inscription VES. must be extracted from Varaždin A group to which it was incorporated by TKN (GÖBL 1989: 29, 34). In 1998 the hoard of Enemonzo comprising tetradrachms of »Kugelreiter« type (however younger specimens as represented in Haimburg hoard) together with Roman Republican victoriati was excavated in Friaul in north-eastern Italy and enabled for the first time the absolute chronological placing of coins of »Kugelreiter« type (younger types!) to the first decades of the second half of the second century BC (GORINI 2005). Indirectly it can also be alleged that the coins of »Kugelreiter« type (older type!) in the Haimburg hoard were minted earlier in the last decades of the first half or around the middle of the second century BC (KOS 2010: 102). Slightly earlier still than the minting of »Kugelreiter« type commenced, the tetradrachms with Venetic inscription VES. (as certain predecessor of coins of Varaždin A type) have been produced.

The coinage of tetradrachms of VES. group was immediately followed by minting of coins of type Varaždin A. It is noteworthy that on some reverses of Varaždin A group the rests of the letters of the legend VES. can still be perceived proving herewith that the legend must have been erased from the reverse die before its re-use (GÖBL 1973: 98 (Rv. 77A); 1989: 29). After obviously short lasting of their production it uninterruptedly proceeds to the minting of coins of Varaždin B type which, again, must have been of short duration. The production of coins of both types was not long lasted and must have been completed rather soon, at least inferring from relatively small number of dies used for the minting. We can therefore with certainty conclude that the minting of coins of Varaždin A type and most probably also of coins of Varaždin B type took place around the end of the first half of the second century BC and was of short time lasting.¹⁴

Since the tetradrachms of VES. type are documented only in the hoard of Haimburg (32 coins) and at Gracarca in south-eastern Carniola (Austria)¹⁵ (1 coin) it is reasonably assuming that this coins must have most probably been produced in the area of south-eastern Carniola (Austria). The minting place of coins of Varaždin A type however, must have moved from south-eastern Carniola along river Drava further to the east to the area around Križovljan.

We propose an indeed hypothetical but logical assumption that travelling die-cutter after finishing production of dies and with them minting of coins of VES. type in south-eastern Carniola travelled along Drava River to the next local tribal chieftain (mint-master) who placed an order to produce coins for his own needs in a local workshop.¹⁶ For the production of new coins (of Varaždin A type) die-cutter at the beginning re-cut dies previously used for minting coins of VES. type in Carniola, eliminating letters in Venetic script. We believe that the same die-cutter produced dies and minted coins of Varaždin B type after completing the production of coins of Varaždin A type in the same workshop. Coin no. 4 in the hoard namely demonstrates such uninterrupted continuance of minting coins of Varaždin B type.

¹⁴ GORINI 2004: 59, dates the minting of coins of Varaždin A and B types to the period 180 and 160 BC. See also GORINI 2009: 120, where he ascribes the minting of coins of Varaždin A type to the first half of the second century BC.

¹⁵ KELLNER 1990: Abb. 6, however, not stating the finding site.

¹⁶ Such evidence in favour of travelling die-cutters who were at the same time also minting coins has lately been strongly supported by the archaeological evidence. See ZIEGAUS 2002; ZIEGAUS 1998: 649. Already MAC-KENSEN 1975: 249 assumed that the mint (workshop) was not fixed to a specific place. His idea was later embraced by GÖBL 1994: 30, who used the term »workshop« rather than term »mint«.

DISTRIBUTION OF COINS OF VARAŽDIN A AND B TYPES

Beside hoard of Križovljan, where coins of type Varaždin A are represented with three specimens, there are two other sites where coins of Varaždin A type were documented with certainty:

1. Veliki Kalnik (Croatia)

Lit.: DEMO 1982: 85, Nr. 1; Abb. 1.
TKN 21A – 77A

Križevci, private collection; 12.4 g; ? h

Lit.:
DEMO, Ž. 1982 – Prilog topografiji križevačke regije u antičko doba. Križevački zbornik, II, 1982, 75–92.

2. Sisak

Acquired in 1864 from the collection of Franjo Dierich in Sisak.

Obv.: Varaždin B, die 24

Rev.: Varaždin A, die – (ad 77A)

ZG 898; 12.36 g; 12h

According to Buora two tetradrachms of type Varaždin A were found stuck together with the third »east-Norican« coin somewhere in unspecified area of Friuli. The photograph however, shows much worn specimens that do not allow the exact determination of the coins (BUORA 1994: 14, 15 fig. 4). One further coin of Varaždin A type should be found in the area of Zuglio and is being kept by the Civici Musei di Udine (BUORA 1994: 20, no. 60). Information could not be checked.

Coins of Varaždin B type are mainly documented in the Križovljan hoard (31 specimens); further 5 specimens are known from five sites.

1. Križevci

Acquired in 1898 from the collection of A. Šenoa in Križevci.

Varaždin B; TKN 24 – 82.

ZG 909; 11.92 g; 9h

2. Kärnten area (Austria)

Lit.: GÖBL 1973: Taf. 21, Nr. 40. DEMBSKI 1998: 90, Nr. 865; Taf. 46, Nr. 865.

TKN 26 – 83a

W 35720; 12.31 g; 10h.

3. Sopron (Hungary)

Lit.: ZIEGAUS 2008: 62.

TKN 24 – 85

12.26 g

4. Vác (Hungary)

Lit.: GÖBL 1973: Taf. 22, Nr. 22.

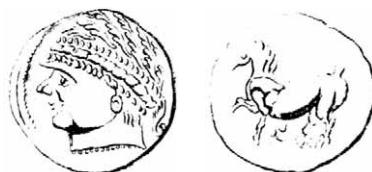

TKN 24 – 85

Stuttgart, Landesmuseum Württemberg; 11.12 g; 10h.

5. St. Peter in Holz – Teurnia (Austria)

Lit.: KUPIDO 1866: 149, Taf. 36, 3.

11.45 g

Coin of Varaždin type should supposedly also be found in Zollfeld.¹⁷ Hauser mentions, however, still visible feet of the rider on the reverse.¹⁸

There are further three tetradrachms that could according to TKN be attributed to the group of coins of Varaždin type.

1. Ogulin area

Very much worn coin found somewhere in the Ogulin area was acquired in 1870 from Franjo Ritz living at Vaganac in the Ogulin military district of the time (the Lika Regiment).

Its obverse die shows some characteristics of obverse die 20B of group Varaždin A and its reverse die similarity to reverse dies 87 and 88 of group of Varaždin B (GÖBL 1973: Taf. 19 and 21). We are convinced, however, that neither coin minted with the obverse die 20B or reverse dies 87 and 88 can be placed in the group of coins of Varaždin type.

ZG 915; 10.42 g; 9h.

2. Frauenberg (Steiermark, Austria)¹⁹

According to Schachinger at Frauenberg two tetradrachms of Varaždin B type (minted with dies 24b – 87) were found.²⁰ R. Göbl (placing the use of both dies to the group of coins of Varaždin B type), however, is calling attention to the fact that coins minted with these dies are representing transition to coins of Samobor C type.²¹ We are convinced that both coins (both dies not being represented in the hoard) should be extracted from the group of coins of Varaždin B type.

17 DEMBSKI 1972: 41.

18 HAUSER 1892: 137.

19 SCHACHINGER 2001: 20 has determined both coins as being minted with dies 24b – 88.

20 SCHACHINGER 2001: 20, Nr. 6; Taf. 31, 6 (10,32 g); 20; SCHACHINGER 2001: 20, Nr. 7; Taf. 31, 7 (10,54 g). She determined the reverse dies of both coins as no. 88.

21 TKN 32, 99.

- a) Lit.: SCHACHINGER 2001: 20, Nr. 6; Taf. 31, 6 (10.32 g); 20.

TKN 24b – 87

10.32 g

- b) Lit.: SCHACHINGER 2001: 20, Nr. 7; Taf. 31, 7 (10.54 g).

TKN -- (ad 83a)

10.54 g

DEPOSITION OF THE HOARD

Since detailed circumstances of the hoard deposition as well as its exact finding site cannot be established,²² it is hardly possible to speculate on the reason for the hoard's deposition. Also the question of the exact time of the deposition of the hoard must remain open. Uncertain piece of evidence is namely the presence of tetradrachm of type »Augentyp-Stamm« (no. 35).²³ This coin essentially disturbs the entirety and compactness of content of the hoard.

According to Göbl the coins of Varaždin B type (average weight 11.53 g)²⁴ were minted in his phase II, whereas coins of »Augentyp-Stamm« type were minted from his phase V.²⁵ Late coining of latter type is confirmed also by its low average weight (9.73 g). In this respect the specimen of »Augentyp-Stamm« in the hoard as the single coin of a different (and much more subsequent) type is suspiciously out of place and must be treated in spite of documentation with utmost caution. If in fact part of the hoard this coin would signify very late deposition of its content, in any case significantly later than the minting of tetradrachms of Varaždin A and B types have actually taken place. It should be stressed however, that in no way whatsoever could the presence of the tetradrachm of »Augentyp-Stamm« in the hoard be interpreted as the evidence for the minting of coins of this type immediately following the minting of coins of Varaždin B type.

Because of rather small number of all documented coins of types Varaždin A and B which are in many cases die linked, as well as for the reason that only a small number of dies used for their minting is known, it can be perceived that coins of both types were obviously not intended for everyday monetary use (for smaller, everyday transactions) and were locally limited in use (circulation?).²⁶ After their minting they must have remained in bulk and as such they must have later been hoarded for unknown reasons.

1844., siječnja/January 27., Varaždin

234

Ex actis et protocollo sessionis magistratalis in domo Praetoreo-senatorea liberae et regiae civitatis Varasdinensis de dato 27. Januarii 1844. celebratae.

Dominus civitatis capitaneus Iosephus Toth ad exigentiam magistratalis sub N. 4384-1843. intervento determinationis officiosam relationem super eo horsum exhibuit, quod e 109 frustis nummorum argenteorum Tessalicorum in promontorio civitatis huius Skarje compellato, adeoque in terreno et iurisdictione civili anno praeterito effosorum, atque perhibente relatione sub N. 2186-1843. inactata apud Samuelem Edler, Iudaeum Kis- Martoniensem, quie videlicet, tales a Iudaeo Toplikensi Iacobo Tenczer incaute coemerat, sequestratorum et ademptorum, – unum frustum occasione ademptionis pro cognoscenda argenti qualitate per gremiale aurifabrum Iosephum Haller liquifactum, – unum frustum ad archivum regii localis gymnasii, iuxta requisitionem respectivorum duorum professorum resignatum, – duo autem frusta fine inspectionis excelae Cameræ regiae Hungarico-aulicæ iam preprius teste relatione sub N. 3506-1843. inactata, submissa fuit, 100 autem frusta pro exigentia gratiosi cameralis intimati de dato 8^{ae} Novembris anni praeteriti, N. 38835, emanati, isthic vero ad N. 4384 a eiusdem regio locali 30^{ae} officio, erga quietantiam eidem relationi adnexam illati habeantur, – una vero remanentia a praemissa nummorum quantitate 5

frusta hac occasione magistratui huic illa subnexa cum propositione exhibuit, ut nummi hi venerandae antiquitatis gratia ad archyvum civitatis huius reponantur; de caetero vero excelsa Camera regia Hungarico-aulica pro eo, ut non tantum valorem inventorum nummorum in currenti argentea moneta iuxta benignas resolutiones regias exolvi curare, sed etiam individua rei numismaticae perita, et sive penes Universitatem regiam vel vero penes Musaeum nationale aut alibi accomodata suo modo provocari facere dignet, ut de nummis praerecensis eruditam dissertationem vulgare vellint, officiose abhinc interpelletur.

Erga quam relationem conclusum est, ut tria frustra supramemoratorum nummorum ad archyvum civitatis huius radicale reponantur, in eodemque in perpetuam rei memoriam asserventur, duo autem frusta Musaeo nationali Croatico transponantur, hocque scopo conformes littera ad regium superiorem Litterarium Directionem Zagrabensem dimittantur. In reliquo tandem, iuxta propositionem domini referentis excelsae Camerae regiae Hungarico-aulicae conformiter abhinc remonstretur. Actum ut supra.

Extradatum per Antonium Melinchevich, m. p., ordinarium notarium.

Nro. 15.921./232

An Seine des Herrn Präsidenten der K. ungarischen Hofkammer, Freiherrn von Mednyánszky, Excellenz.

Hochwohlgeborner Freiherr!

Die hungarische Hofkammer hat unter dem 27. v. M. Z. 11.154 von den, im Weichbilde der Stadt Warasdin gefundenen 109 Silbermünzen, 102 Stück, mit dem Bemerkung vorgelegt, daß die übrigen 7 Stück durch den Stadtmagistrat, theils zum Gebrauche des städtischen Archivs und Lokal-Gymnasiums, theils für das Kroatische National-Museum zurückbehalten worden sind.

Nachdem aber den bestehenden Vorschriften gemäß alle Fundmünzen im Kameral-Wege eingeliefert werden müssen und die Überlassung solcher an Musäen und Sammlungen erst nach vorausgegangener Auswahl für das k. k. Münz- und Antiken-Kabinet Platz greifen darf, so ersuche ich Eure Excellenz gefälligst zu veranlassen, daß auch die eigenmächtig zurückbehaltenen 7 Stück Münzen der vorschriftmäßigen Verhandlung der Kameral-Behörde unterzogen werden und bei deren nachträglicher Einsendung von Seite der k. ungarischen Hofkammer auch auf die Würdigung des in diesem Falle vom Warasdiner Stadt-Magistrate eingehaltenen vorschriftwidrigen Verfahrens, und auf die Frage eingegangen werde, ob und was zur Hindanhaltung ähnlicher Vorgänge vorzukehren wäre?

Wien, am 3. Mai 1844.

Suae Maiestati Sacratissimae.

Ex incidenti illo, quod thesaurus in promontorio civitatis Varasdinensis Skarje compellato inventus e 109 frustis antiquorum nummorum argenteorum praetensive Thessalicorum constans per civicum magistratum Varasdinem, retentis exinde partim pro usibus archivi civici et localis gymnasii, partim pro repositione ad Musaeum Nationale Croaticum 7 frustis, nonnisi cum 102 frustis manibus cameralibus resignatus fuerit, abhinc ope humillimae representationis de dato 27. Maii 1844., N^{ro} 11.154 factae altissimo loco substratus – medio litteratum praesidii Camerae caesareo-regiae universalis aulicae de dato 3. Maii 1844., N^{ro} 15.921/232 exaratarum significatum fuit: ut, cum secundum praexistentes benignas normativas resolutiones regias quivis thesaurus pro

faciendo in usus Numophilacii caesareo-regii oportuno delectu in sua integritate manibus camera-libus resignari debeat, retenta per magistratum Varasdinem e paeattacto thesauro septem frustra ab eodem recaptiventur, idemque ad dandam super commisso per hanc retentionem in normativos ordines impingenti arbitrio legitimationem provocetur, una vero eadem oportunitate quaestio expendatur, num ex incidenti praesentis casus ad praecavendos in futurum similes abusus aliquid et quid in specie providendum sit?

Attactus civicus magistratus in conformitate praemissorum inviatus, medio humillime adlatratae remonstrationis suae, se per id, quod ex magnis fatigis e manibus Iudeorum recaptivati in fundo et terreno civitatis, quae pro comparatione et aquisitione collectionum institutis extra regnum Croatiae existentibus illatarum notabiles summas promte et citra tergiversationem solvit – inventi thesauri frustis 109; unum fine cognoscendae metalli qualitatis liquifieri fecerit, unum requirenti locali gymnasio, duo vero Nationalis Musaei Instituto, quod ex privatorum largitate citra donationem per integrum regnum factam consurrexit, resignaverit, tria tandem venerandae antiquitatis gratia ad radicale civitatis archivum reposuerit – arbitrium haud quaquam commississe putat, una petitum subiugendo quo a repetitione horum 7 frustorum e respectu illo, quod liquefactum amplius rehabet, donum vero semel factum revocari nequeat – praescindi velit.

Interea etiam, donec causarum regalium director relationem in ordine ad quaestionem circa adhibenda ad praecavendos similes abusus oportuna media depositam relationem praestiterit, obsequentissima Camera haec regia Hungarico Aulica praeductam remonstrationem civici magistratus Varasdinem Maiestati Vestrae Sacratissimae omni in humilitate cum eo substernere sustinet, quod – tametsi respectus illi, quos civicus magistratus adfert reflexionem mereantur, eundem tamen culpa maneat, quod penes scientiam normalium ordinum cum re aerarali arbitrarie egerit interim spectata exhibitate valoris retentorum nummorum et sumto in considerationem eo, quod iidem non privato alicui, sed publicis institutis cessi sint, censem obsequentissimum hocce dicasterium a repetitione vertentium in quaestione nummorum praescindendum attamen eidem civico magistratu iniungendum esse, ut in futurum altissimis ordinationibus regiis semet magis conformet.

Sub 44.304-1844. – argentum.

1844., Budim/Buda

44.304.

Benigno rescripto regio e substratis medio repraesentationis de dato 27^{ae} Martii anni currentis, N° 11.154, in territorio liberae regiaeque civitatis Varasdinensis repertis 102 frustis Celticae argenteae monetae pro caesareo regio Nummophylacaeo 10 frustis retentis, reliqua frusta cum compensationali retentorum frustorum praetio 12 florenorum conventionalis monetae pro ulteriori normali pertractione eo subiuncto remittuntur: quod ab spletoria repetitione 7 frustrorum, quae magistratus dictae civitatis arbitrarie retinuit, in remonstratis circumstantiis pro hac vice, e gratia praescissum habeatur, dicto magistratui tamen haec normalibus praescriptis adversa eius procedura exponenda praecipitur.

Priusquam in obsequium praesentis benignae resolutionis regiae ratione intermissae submissionis 9 nummorum necessaria Varasdinensi civico magistratui abhinc intimentur, in sequelam eiusdem benignae resolutionis Regiae Gremiali Taxatoratus Officio provocative ad relationem sub N° 9845. anni currentis occurrentem penes communicationem aestimatorialis instrumenti committatur ut summam relutionalem pro retentis penes Viennense Caesareo- Regium Nummophylacium 10 frustis nummorum cum 12 florenis conventionalis monetae interea in deposito servet, relate autem ad reliqua 92. frusta nummorum individua ex parte Musaei nationalis Hungarici et Scientiarum Universitatis Pestanae, quae pro consueto selectum pro publicis his institutis instituere solent exmittenda ad officium suum fine instituendi nefors ex his remanentibus frustis delectus – admittat, et seligenda forsitan frusta erga obeniens pretium estimationale interceptum summendum tradat, et super eventu relationem praestet, et si delectus termino sex septimanarum non intercederet, desuper quoque remonstrationem faciat. Et ideo tam Sua Serenitas caesareo-regia dominus Regni Palatinus, praesimaliter, item Academicus Magistratus Universitatis Pestanae, de praevio thesauro in gremiali Taxatoratu scopo instituendi erga debitam compensationem delectus asservato, ea cum requisitione edoceatur, et quidem Sua Serenitas, quo si ita benigne visum fuerit, pro Musaei nationalis e thesauro hoc delectum benigne ordinare dignetur, academicus autem magistratus fine ordinandi pro parte Cymelii Regiae Scientiarum Universitatis e thesauro hoc delectus certioreetur.

Duo autem dein praeattactus thesaurus conformiter manifestato per civicum magistratum Varasdinem sub N° 11.154 anni currentis desiderio, in pretio compensationali abhinc transponi, et respective ad pertractandum in sensu praexistentis benignae resolutionis regiae de dato 5^{ae} Aprilis 1792., N° 461 editae, sub 25. Aprilis, numero camerale 5935, circulariter publicatae inviari, et Consilium quoque Regium Locumtenentiale Hungaricum erga insinuatum, sub N° 24.484. anni currenti de dispositis edoceri valeat, committatur Causarum Regalium Directori, ut appromissam sub N° 24.485 anni currentis hoc in obiecto relationem praestet, tum vero erga ordines sub N° 28.658 anni currentis dimissos desideratam quoad qualiter in futurum praepediendos intuitu thesaurorum in obversum praexistentium normativorum exoriri queentes abusus opinionem distincta relatione mediante depromat.

SAŽETAK

SKUPNI NALAZI NOVCA IZ HRVATSKE XVII. SKUPNI NALAZ KELTSKIH TETRADRAHMI IZ KRIŽOVLJANA (VARAŽDINA) IZ 1843. GOD.

UVOD

Godine 1843, na položaju Škarje nedaleko Križovljana Radovečkog, približno 17 kilometara sjeverozapadno od Varaždina, uz staru cestu Varaždin – Ptuj (gš.: 46°22', gd.: 16°07'; sl. 1–2) iskopano je blago koje se sastojalo od 102 keltske tetradrahme (MIRNIK 1981: 44, 65). K. Pink, M. Šimek, kao i neki drugi autori, pišu da je u stvari otkriveno 109 srebrnika (PINK 1937: 48; ŠIMEK 1990: 38, 90). Ta se ostava često spominje u numizmatičkoj literaturi.²⁷ Umjesto da ostava, kao uostalom i tip keltskog novca, dobiju ime po Križovljanu, dobili su naziv prema Varaždinu (njem. Warasdin; PINK 1937: 43, 45, 48–49, 68, 69, Pl. 1; KLEMENC – SARIA 1936: 72; KOS 1977: 35). Takav je bio i slučaj s dva druga skupna nalaza i tipa keltskog novca hrvatske grupe. Samoborski skupni nalaz iz 1922. god. nije pronađen u Samboru, već u šumi Jama ispod ruševina srednjovjekovnog Okić-grada, a đurđevački skupni nalaz nije iskopan 1887. god. u Đurđevcu, nego na brdu Kostanj u blizini Šemovca (sl. 3).

Ipak, u središnjem arhivu obitelji Habsburg (*Haus-, Hof- und Staatsarchiv*), kojeg je preustrojila u Beču 1749. god. Marija Terezija, čuvaju se dva dokumenta u fondu *Oberstkammeramt B*, Rnr. 374 iz 1844. god., iz kojih je razvidno da su u okolini Varaždina nađena 102 komada srebrnika. Od tih je deset primjeraka predano numizmatičkom kabinetu (*Münzkabinett*) današnjeg Povijesnomjetničkog muzeja (*Kunsthistorisches Museum*) u Beču, 20 primjeraka je darovano Ugarskoj dvorskoj komori (*Hofkammer*) da ih ona prosljedi znanstvenim ustanovama u Ugarskoj i Hrvatskoj. Daljnja 22 novca prodana su na dražbi, a preustalih 50 tetradrahmi je prema zakonskim propisima toga vremena rastopljeno:

²⁷ KENNER 1896: 331; KLEMENC – SARIA 1936: 72; PINK 1937: 48; 1939: 113, 139; 1950: 38, 43; GÖBL 1973: 97–99, 126–127; DUKAT, Z. – I. MIRNIK 1976: 187, 189–190; 1978: 198–199, 205, 207; LIŠČIĆ 1978: 240–244, 250, 255–266, 259, Pl. I, IV; MIRNIK 2008: 120–121, 122.

2064 »... hat die k. ungarische Hofkaemmer hundert zwei stück auf dem Varasdiner staedtischen Terrain gefundene und durch das Pester k. k. Gold- und Silbereinlössamt im Ganzen auf 92 f 15 xr geschaetze Münzen anher vorgelegt.«

2129 »... aus 102 St celtischen Silbermünzen bestehenden Funde, welcher auf dem Varasdiner staedtischen terrain gemacht wurde, behaelt das k. k. Münzkabinet 10 Stücke, wofür der Ersatz c. p. a. mit 12 f beiliegt 20 Stücke erhaelt die kön. Ung. Hofkammer zu Ofen zur beliebigen für die Wissenschaft ersprienslichen Vertheilung so seltener u. merkwürdiger Reste des Altertums an die gelehrten Institute u Lehranstalten Ungarns u. Croatiens. 22 Stücke sind zu Lizitieren, der Rest zu 50 Stück zum Einschmelzen bestimmt.«²⁸

Danas se u Numizmatičkoj zbirci Arheološkog muzeja u Zagrebu čuva 16 primjeraka tetradrahmi, 9 ih je u Numizmatičkom kabinetu bečkog *Kunsthistorisches Museum*, a 10 novaca je u Numizmatičkom kabinetu Mađarskog nacionalnog muzeja (*Magyar Nemzeti Múzeum*) u Budimpešti.²⁹ Tako smo mogli dokumentirati sveukupno 35 srebrnika iz te ostave (34,3 % izvornog sastava). Zagrebačke primjerke tetradrahmi uključio je Šime Ljubić u svoj katalog Numizmatičke zbirke (LJUBIĆ 1890: 40–42, 3–16, P. 2,3), no njihove težine se razlikuju od današnjih izmjera te se ne mogu identificirati sa sigurnošću. Jednu od tih tetradrahmi (sl. 4) Ljubić je uklopio i na tablu skupa s drugim keltskim novcem Zagrebačke zbirke (sl. 6), a sačuvan je i kliše te table (sl. 5, 7). Po svom dolasku u zagrebački Narodni muzej, odnosno njegov Arheološki odjel, Josip Brunšmid je započeo ispunjavati nove inventarne knjige i kartoteke, pa su tetradrahme tipova Varaždin A i B doble inventarne brojeve 898–916 i 5771 u inventaru grčkog novca. (sl. 8). Tetradrahme iz ostave u Križovljalu danas se nalaze u stalnom postavu Numizmatičkog (DUKAT – MIRNIK 2004: 60–61; 2008: 60–61) te pretpovijesnog odjela, a dva su primjerka (Varaždin A, B) bila također izložena u okviru izložbe »*Dreitausend Jahre Vorgeschichte. Meisterwerke der Metallzeit im kontinentalen Kroatiens*« (3000 godina pretpovijesti. Remek-djela metalnog doba u kontinentalnoj Hrvatskoj) u Keltskome muzeju (*Keltenmuseum*) u Hochdorfu (Njemačka) 2008–2009 (MIRNIK 2008: 120, 190, nos. 121–122).

Pojedinačnih primjeraka keltskog novca varaždinskog tipa mora da se nalazilo u raznim europskim numizmatičkim kabinetima i prije i poslije otkrića u Križovljalu. Tako je npr. bilo takvih tetradrahmi Joanneumu u Grazu (PICHLER 1865: 149, 19, T.III,19), Cabinet des Médailles u Parizu (MURET – CHABOUILLET 1889: 235, 9912; DE LA TOUR 1892: Pl. LI, 9912), u Švicarskom zemaljskom muzeju (*Schweizerisches Landesmuseum*) u Zürichu (CASTELIN 1976: 118, 1174–1186; 198, 1174–1186), također i u zbirci grofa Miklósa Desseffyja (1910: 11, Pl. III, 82) i princa Ernsta Windisch-Grätza (FIALA 1900: (203, 2841–2843, Pl. III, 2841) collections. I u zagrebačkom Arheološkome muzeju postoje dva primjerka tipa Varaždin B koji nisu nađeni u ostavi iz Križovljala: br. 898 (nađen u Sisku, otkupljen skupa sa zbirkom Franje Diericha 1864. god.), 909 (iz Križevaca, iz zbirke Augusta Šenoe kupljene 1898. god.), 915 (s područja nekadašnje Ogulinske pukovnije, kupljen od trgovca Franje Ritzu iz Vaganca 1870. god.).

Varaždinski tip keltskog novca često je obrađivao u numizmatičkoj literaturi, počam od Karla Pinka (1937: T I,1; 1939: 139, 154; 155, T. XXVII,552; 1950: Pl. VII,105) i Roberta Göbla (1973: T. 10–21).

28 Naljepše zahvaljujemo Péteru Prohászki (Budimpešta) za podatke i dokumente.

29 Melinda Torbágyi (Budimpešta) and Klaus Vondrovec (Beč) zadužili su nas u velikoj mjeri s fotografijama i važnim podatcima.

SASTAV OSTAVE

Na temelju svega 34 % izvornog skupnog nalaza, od kojeg je već, kako se čini, 50 % službeno pretopljeno 1844. god., možemo ustvrditi da su zastupljene najranije tetradrahme tzv. taurišanske skupine. Skupni nalaz sastojao se od tetradrahmi tipa Varaždin A, Varaždin B kao i »očnog« (*Augen-typ-Stamm*) tipa.
