### IMPLANTOLOGY CONGRESS

### Welcome Address and Committees

Dear colleagues,

I'm very proud to announce that the 1st Oral Implantology World Congress will take place in Paris under the auspices of Paris Descartes university. Welcome to Paris on the  $2^{nd}$  of July for an exceptional meeting and unforgettable occasion. I am waiting for you July 2-4, 2014 in Paris.

### Pr Louis MAMAN

DDS, PHDDEAN, FACULTY OF ODONTOLOGY, PARIS DESCARTES UNIVERSITY

Dear colleagues,

It is a great honour to announce that the 1<sup>st</sup> Oral Implantology World Congress will take place in Paris on July 2<sup>nd</sup>, 2014. As the patients are getting older, the treatments are becoming more complex. The decision to establish a dental implant strategy is a crucial issue for general practitioners and specialists.

The aim of this academic congress is to propose a clinical and practical approach of dental implant planning, but also how to deal with maxillar bone resorption and decision making for an anterior tooth replacement. Highly skilled worldwide clinicians will be discussing these topics.

Meanwhile, the world 's leading companies will be present in a large trade exhibition. Enlight your practice with implants while visiting Paris "la ville lumière" on July 2014.

### WFLD CONGRESS

### Welcome Address and Committees

Dear colleagues,

I am very honoured to invite you participate in the 14<sup>th</sup> WFLD World Congress, which will take place in Paris. In 1990 I participated in the Congress organized by Prof Melcer, one of the pioneers in the use of laser in dentistry.

I am very proud to return 24 years later as President of WFLD and am sure that Prof Gaultier, Prof Rocca and Navarro's exceptional team is preparing a great scientific event and presenting many clinical cases for better use of laser in our field.

Nowadays WFLD is present on 5 continents, in almost 50 countries with the mission of propagating science with no economic interest. Join a great Congress in a wonderful city.

Pr Aldo Brugnera Junior, DDS, MS, PhD

PRESIDENT OF WFLD

A long time ago (1990), Prof. Jacques MELCER welcomed the ISLD (today WFLD)  $2^{\rm nd}$  meeting in Paris. Twenty four years later, WFLD members are invited to join the WFLD General meeting in the French capital. Since the beginning WFLD is devoted to the development of oral laser treatments. A lot of progresses have been and are still observed. We are all aware of those progresses and WFLD members are proud to play a role in this development.

The next WFLD meeting is a great opportunity to continue our efforts, with enthusiasm, to hear are new methodologies and new applications, to support young searchers in the field of clinical studies or basic research and to meet in an amicable atmosphere. Don't forget to join the 14th WFLD meeting. Welcome in Paris.

Poster session Group 1: Thursday, July 3rd in room 33 at 10:00-10:45

Evaluation of CEM cement as a retrofilling biomaterial in root-end cavities prepared by Er,Cr:YSGG laser and Ultrasonic.

Marziyeh AGHAZADEH

Evaluation of laser photobiomodulation ( $\lambda$  780 nm) on repair of dental replantation in rats. Fabiola CARVALHO

Observation of resected apical surfaces of human premolars by swept-source optical coherence tomography.

Arata EBIHARA

Microleakage and temperature rise of obturated root canals after disinfection with Nd:YAG laser, PDT and NaOCL and EDTA.

Tzvetelina GUEORGIEVA

Detection of the second mesiobuccal canal of maxillary molars by swept-source optical coherence tomography-Comparison between inexperienced and experienced dentists. Yoshiko LINO

Apical Extrusion of Root Canal Irrigants during Root Canal Irrigation Activated by Diode Laser. Kazuhisa SATAKE

Er:YAG Laser-activated Irrigation for Lateral Canals.

Kanako YAO

### **IMPLANTOLOGY**

No poster session scheduled. Exhibition posters in room 69

Provisional prothesis for a one tooth edentulous.

Layla ASSILA

Evaluation of biocompatibility of photodynamic therapy in rat calvarial defects. A pilot study. Carlos DE PAULA EDUARDO

To Be Failured Or Not To Be.

Cevlan FRTUGRUI

In Vivo Effect Of Biodegradable Membrane In Immediate Implant Placement In the Esthetic Zone On Bone And Soft Tissue Profile.

Mustafa KHALLAF

Fortuitous discovery of an aspergillosis within the preimplant evaluation. Mérvl MACCOTTA

ORCA Overdenture Retained by Clip and Attachment.

Nilo Guliberto MARTINS CHÁVARRY

Peri-Implantitis - And They Lived Happily Ever After.

Lise SLACK

Immediate implant placement combined with titanium granules.

Helmut G. STEVELING

### LASER AND BONE SURGERY

Poster session Group 5: Friday, July 4th in room 33 at 10:00-10:45

Surgical excision of mandibularis torus with Erbium Cromium laser.

Jean GROLLERON

Evaluation of laser photobiomodulation effects in peri-implantar bone repair through biomechanical test and X-Ray fluorescence: study in dogs.

Alexandrino SANTOS NETO

### LASER AND PROSTHETICS

Poster session Group 5: Friday, July 4th in room 33 at 10:00-10:45

Microleakage of a resin cement after disinfection pretreatments: Effects of laser irradiation and chemical antibacterial agents.

Fereshteh SHAFIFI

### LASER AND SAFFTY

Poster session Group 5: Friday, July 4th in room 33 at 10:00-10:45

Assessment of blinding success among laser clinical trials.

Jafar KOLAHI

### LASER-TISSUES INTERACTION

Poster session Group 4: Thursday, July 3rd in room 69 at 15:30-16:15

Evaluation of the biomodulation of the peri implant bone, using diagnodent in patients undergoing low intensity laser therapy. In vivo study.

Luiz BISPO

Effects of 4W power 1950nm diode laser on oral hard and soft tissues: a preliminary "ex vivo" study.

Barbara DALLARI

### IMPLANTOLOGY CONGRESS AND WFLD CONGRESS

## Posters (classified by themes)

Relationship between the degree of dental enamel mineralization and the optical attenuation coefficient.

Anderson FREITAS

Femtosecond laser ablation of enamel and the application of acoustic emission as a monitoring method for laser treatment of dental caries.

Co2 Laser Irradiation And Fluoride Enhances Caf2 Uptake And Inhibits Lesion Progression Of Demineralized Dental Enamel – In Vitro Study.

Marines NOBRE DOS SANTOS

Low intensity laser as an alternative treatment for oral ulcers associated with Therapy in Organ Transplantation (TOR) inhibitors

Denise Maria ZEZELL

### ORAL SURGERY

Poster session Group 6: Friday, July 4th in room 69 at 10:00-10:45

The use of Nd:YAG laser for the treatment of vascular anomalies: 50mpatients case-series of the University of Parma.

Michele CHIUSANO

Evaluation of using digitally controlled handpiece of ER:YAG laser for surgical treatment of leukoplakia.

Dragana GABRIĆ PANDURIĆ

Laser-assisted surgical treatment of excessive gingival display using lip repositioning technique as an alternative to orthognathic surgery.

Petra LIBERT

Effectiveness evaluation of combined erbium and diode laser application among patient suffered from periapical lesion.

Roman PIYAMOV

### **ORTHODONTICS**

Poster session Group 7: Friday, July 4th in room 33 at 15:30-16:15

LLLT Periodontology in Orthodontic Treatment.

Attilia PFTRINI

Effect of CO2 laser and fluoride dentifrice on demineralization around orthodontic brackets:an in situ study.

Livia RODRIGUES

### **PEDODONTIC**

Poster session Group 5: Friday, July 4th in room 33 at 10:00-10:45
