General Information

Date and Place
The Conferences of the Hungarian Language Teacher Training Faculty in Subotica will take place between October 18–20, 2018 in Subotica, Serbia, in the building of the Faculty called Yellow House (11 Strossmayer street).

Languages of the proceedings
Simultaneous translations into Hungarian and Serbian will be provided during the conferences.
The official languages of the conferences are: Hungarian, Serbian, Croatian and English.

Proceedings
The proceedings are published only in printed format; each registered participant receives one (1) copy of Abstracts.

Registration Desk (ground floor, Office for Registration)
The Registration Desk will be open during the Conferences:
Thursday, October 18th, 9a.m. – 6p.m.
Friday, October 19th, 8a.m. – 12a.m.

Information Desk (1st floor)
The Information Desk will be open during the Conferences.
Thursday, October 18th, 9a.m. – 6p.m.
Friday, October 19th, 8a.m. – 12a.m.

Presentations
The conferences rooms are supplied with data projectors and interactive boards.

Smoking
Because of the law restrictions in Serbia, smoking is prohibited in the Faculty building, as well as in the street next to the Faculty building.

Parking
The Faculty is situated in the town centre, which is in a parking zone - you can buy parking slips for hours or for a whole day (it costs about 3 Euros). Parking slips can be purchased near the Faculty building, but we can also provide assistance in managing parking.

teaching process. The extent of program realization, the attitude of lecturers and the efficiency of the examination system were tested.

Keywords: pedagogical-psychological-methodological training; adult education; efficiency analysis

PEJIĆ, Stanko

FORCED MIGRATION (ARTHUR LIEBERT)

The author’s goal is to show forced migration. He uses the life of Arthur Liebert as an example. After he explains examples of migrations, he starts to speak about Arthur Liebert’s life. But when he discusses Liebert’s life, he describes an atypical biographical story, namely a story of an emigrant’s life. In addition to speaking about migration, Arthur Liebert’s story shows us the importance of philosophical community for society, to be specific the critical view for state affairs in the society. The author aims to show how political decisions can make an influence on citizens’ migrations and how the structure of citizens changes within a country.

Keywords: Arthur Liebert, migration, philosophy, politics, population

POPOVIĆ, Ana – POPOVIĆ, Željko – BOGUT, Irela

BODY PERCUSSION: A PREVENTION PROGRAM IN EVERYDAY TEACHING PRACTICE

Recent studies have mostly confirmed Gardner’s theory of multiple intelligences. Music is an exceptional education medium, as it develops all the intelligences, not just the musical one. Therefore, a wider use of music in education should be considered. Body percussion is already in use in music therapy sessions, as it has positive effects on patients with various medical diagnoses. The aim of this paper is to point out the benefits of practicing body percussion in prevention of various diagnoses. As a school activity it can be easily included in the everyday school routine: it does not require instruments or any special tools, it can be practiced in a multilingual ambience and it is suitable for all age groups.

Keywords: Gardner’s theory of multiple intelligences, body percussion, music therapy, music in the education system
